## **IHE Patient Care Coordination (PCC) Technical Framework Supplement**

10

### **Antepartum Profiles**

### **Trial Implementation**

15

Date: August 30, 2010  
Author: Tone Southerland  
Email: pcc@ihe.net

## Foreword

- 20 This is a supplement to the IHE Patient Care Coordination Technical Framework V6.0. Each supplement undergoes a process of public comment and trial implementation before being incorporated into the volumes of the Technical Frameworks.
- This supplement is submitted for Trial Implementation as of August 30, 2010 and will be available for testing at subsequent IHE Connectathons. The supplement may be amended based
- 25 on the results of testing. Following successful testing it will be incorporated into the Patient Care Coordination Technical Framework. Comments are invited and may be submitted on the IHE forums at <http://forums.rsna.org/forumdisplay.php?f=309> or by email to pcc@ihe.net.
- This supplement describes changes to the existing technical framework documents and where indicated amends text by addition (**bold underline**) or removal (~~**bold strikethrough**~~), as well as
- 30 addition of large new sections introduced by editor's instructions to "add new text" or similar, which for readability are not bolded or underlined.
- "Boxed" instructions like the sample below indicate to the Volume Editor how to integrate the relevant section(s) into the relevant Technical Framework volume:

- 35 **Replace Section X.X by the following:**

General information about IHE can be found at: [www.ihe.net](http://www.ihe.net)

Information about IHE Patient Care Coordination can be found at:  
<http://www.ihe.net/Domains/index.cfm>

- 40 Information about the structure of IHE Technical Frameworks and Supplements can be found at:  
<http://www.ihe.net/About/process.cfm> and <http://www.ihe.net/profiles/index.cfm>

The current version of the IHE Technical Framework can be found at:

## Introduction

This supplement is written for Trial Implementation. It is written as changes to the documents listed below. The reader should have already read and understood these documents:

- 115     1. [PCC Technical Framework Volume 1, Revision 6.0](#)  
          2. [PCC Technical Framework Volume 2, Revision 6.0](#)

This supplement also references other documents<sup>1</sup>. The reader should have already read and understood these documents:

- 120     1. [IT Infrastructure Technical Framework Volume 1, Revision 7.0](#)  
          2. [IT Infrastructure Technical Framework Volume 2, Revision 7.0](#)  
          3. [IT Infrastructure Technical Framework Volume 3, Revision 7.0](#)  
          4. [The Patient Identifier Cross-Reference \(PIX\) and Patient Demographic Query \(PDQ\) HL7 v3 Supplement to the IT Infrastructure Technical Framework.](#)  
          5. HL7 and other standards documents referenced in Volume 1 and Volume 2  
125     6. Dilbert 2.0: 20 Years of Dilbert by Scott Adams, ISBN-10: 0740777351, ISBN-13: 978-0740777356

## How to read the Antepartum Profiles supplement

This supplement contains 4 content profiles – Antepartum History and Physical (APHP), Antepartum Summary (APS), Antepartum Laboratory (APL), and Antepartum Education (APE). Antepartum Record (APR) is no longer a profile as it has been subsumed by Perinatal Workflow (PW) profile.

Please see the below documents that will need to be referenced to fully understand the profiles in this supplement. Each document has a short description describing what is contained.

- 130     1. **Perinatal Workflow (PW):** makes use of the antepartum, labor and delivery, postpartum, and newborn delivery profiles (some are in this supplement and many are in other supplements).  
          2. **Content Modules Supplement:** This document contains all PCC Section Templates, Entry Templates and Value Sets that are *not* in Final Text (that is, they are not in the Technical Framework Volume 2).

---

<sup>1</sup> The first four documents can be located on the IHE Website at [http://www.ihe.net/Technical\\_Framework/index.cfm#IT](http://www.ihe.net/Technical_Framework/index.cfm#IT). The remaining documents can be obtained from their respective publishers.

- 135 3. **PCC Technical Framework Volume 2, Revision 6.0 (published August 2010):** This contains all PCC Section Templates, Entry Templates and Value Sets (among other things) that *are* in Final Text.

## How to Access the Reference Material

To access Perinatal Workflow, CDA Content Modules or the PCC Technical Framework refer to the same web page from which you accessed this supplement or follow the instructions below. Navigate to <http://www.ihe.net>

- 140
- Click “Developer Resources” on the top menu
  - Select “Technical Frameworks”
  - Click the “Patient Care Coordination” link

## Open Issues and Questions

- 145 1. Antepartum Laboratory (APL) currently consists of one document content module – should lab results instead be part of Antepartum Summary as a Coded Results section? This Coded Results section can still point to the Antepartum Laboratory value set as APL currently does now. This approach is consistent with how other data is structured in similar PCC content profiles.

150

## Closed Issues

155

# Volume 1 – Profiles

*Add the following to section 1. 5*

## 1.5 Copyright Permissions

160

*Add the following to section 2.4*

## 2.4 Dependencies of the PCC Integration Profiles

<Profile Name>	<?>	<?>	<->
----------------	-----	-----	-----

*Add the following to section 2.5*

## 2.5 History of Annual Changes

165

*Add Section W*

## **W Antepartum History and Physical Content Profile (APHP)**

- 170 Antepartum History and Physical is a content profile that defines the structure of the data that is often collected at the initial ambulatory office visit for a pregnant patient. It includes, but is not limited to demographics, histories, allergies, review of systems, physical examinations, and vital signs.

### **W.1 Purpose and Scope**

*Change referenced section numbering when merged into technical framework*

- 175 Obstetric patients in labor and admitted to Labor and Delivery must have a complete summary of their antepartum ambulatory care available at the time of admission for optimal care. While this profile represents a portion of that data, and may be included with other antepartum care documents to make up a patient's Antepartum Record, it may also be created as a stand alone document as it is often transmitted separately from those other antepartum care documents. For further information on the full Perinatal Workflow overview and use cases see Perinatal Workflow section X.1.2 and section X.2.
- 180

### **W.2 Process Flow**

#### **W.2.1 Use Cases**

*Change referenced section numbering when merged into technical framework*

- 185 For applicable use cases see Perinatal Workflow section X.2.1.

#### **W.2.2 Diagrams**

*Change referenced section numbering when merged into technical framework*

- For applicable diagrams see Perinatal Workflow section X.2.2.

### **W.3 Actors/Transactions**

- 190 There are two actors in this profile, the Content Creator and the Content Consumer. Content is created by a Content Creator and is to be consumed by a Content Consumer. The sharing or transmission of content from one actor to the other is addressed by the appropriate use of IHE profiles described below, and is out of scope of this profile. A Document Source or a Portable Media Creator may embody the Content Creator Actor. A Document Consumer, a Document Recipient, or a Portable Media Importer may embody the Content Consumer Actor. The sharing or transmission of content or updates from one actor to the other is addressed by the use of appropriate IHE profiles described in the section on Content Bindings with XDS, XDM and XDR in PCC TF-2:4.1.
- 195

200

**Figure X.3-1 Actor Diagram**

### **W.3.1 Requirements of Actors**

## **W.4 Options**

205 Options that may be selected for this Content Profile are listed in the table W.4-1 along with the Actors to which they apply. Dependencies between options when applicable are specified in notes.

**Table W.4-1 Antepartum History and Physical Options**

Actor	Option	Section
Content Consumer	View Option (See Note 1) Document Import Option (See Note 1) Section Import Option (See Note 1) Discrete Data Import Option (See Note 1)	PCC TF-2: 3.1.1 PCC TF-2: 3.1.2 PCC TF-2: 3.1.3 PCC TF-2: 3.1.4
Content Creator	No options defined	

210

Note 1: The Actor shall support at least one of these options.

## **W.5 Groupings**

## **W.6 Security Considerations**

Add Section X

## X Antepartum Summary Content Profile (APS)

- 220 *Change referenced section numbering when merged into technical framework*  
Antepartum Summary is a content profile that defines the structure for the aggregation of significant events, diagnoses, and plans of care derived from the visits over the course of an antepartum episode. It is represented in part by Estimated Due Dates and a Visit Summary Flowsheet in which the aggregated data from the ambulatory office visits is recorded, as well as 225 allergies, advance directives, care plans, and selected histories are provided.

### X.1 Purpose and Scope

- 230 *Change referenced section numbering when merged into technical framework*  
Obstetric patients in labor and admitted to Labor and Delivery must have a complete summary of their antepartum ambulatory care available at the time of admission. While this profile represents a portion of that data and may be included with other antepartum care documents to make up a patient's Antepartum Record, it may also be created as a stand alone document and may be transmitted separately from those other antepartum care documents. For further information on the full Perinatal Workflow overview and use cases see Perinatal Workflow section X.1.2 and section X.2.

### X.2 Process Flow

#### X.2.1 Use Cases

- 235 *Change referenced section numbering when merged into technical framework*  
For applicable use cases see Perinatal Workflow section X.2.1.

#### X.2.2 Diagrams

- 240 *Change referenced section numbering when merged into technical framework*  
For applicable diagrams see Perinatal Workflow section X.2.2.

### X.3 Actors/Transactions

- 245 There are two actors in this profile, the Content Creator and the Content Consumer. Content is created by a Content Creator and is to be consumed by a Content Consumer. The sharing or transmission of content from one actor to the other is addressed by the appropriate use of IHE profiles described below, and is out of scope of this profile. A Document Source or a Portable Media Creator may embody the Content Creator Actor. A Document Consumer, a Document Recipient, or a Portable Media Importer may embody the Content Consumer Actor. The sharing or transmission of content or updates from one actor to the other is addressed by the use of

- 250 appropriate IHE profiles described in the section on Content Bindings with XDS, XDM and XDR in PCC TF-2:4.1.

**Figure X.3-1 Actor Diagram**

255

### X.3.1 Requirements of Actors

## X.4 Options

- Options that may be selected for this Content Profile are listed in the table X.4-1 along with the Actors to which they apply. Dependencies between options when applicable are specified in notes.

**Table X.4-1 Antepartum Summary Options**

Actor	Option	Section
Content Consumer	View Option (See Note 1) Document Import Option (See Note 1) Section Import Option (See Note 1) Discrete Data Import Option (See Note 1)	PCC TF-2: 3.1.1 PCC TF-2: 3.1.2 PCC TF-2: 3.1.3 PCC TF-2: 3.1.4
Content Creator	No options defined	

Note 1: The Actor shall support at least one of these options.

- 265 **X.5 Groupings**

## X.6 Security Considerations

## X.7 Content Modules

**Table X.7-1 Antepartum Summary Content Modules**

<b>ACOG Antepartum Record Datum</b>	<b>PCC Template Name</b>	<b>PCC Template Id</b>

270

*Add Section Y*

## **Y Antepartum Laboratory Content Profile (APL)**

*Change referenced section numbering when merged into technical framework*

- 275 Antepartum Laboratory is a content profile that provides the data structure to represent results from standard laboratory tests administered during the antepartum episode.

### **Y.1 Purpose and Scope**

*Change referenced section numbering when merged into technical framework*

- 280 Obstetric patients in labor and admitted to Labor and Delivery must have a complete summary of their antepartum ambulatory care available at the time of admission. While this profile represents a portion of that data and may be included with other antepartum care documents to make up a patient's Antepartum Record, it may also be created as a stand alone document and may be transmitted separately from those other antepartum care documents. For further information on the full Perinatal Workflow overview and use cases see Perinatal Workflow section X.1.2 and section X.2.
- 285

### **Y.2 Process Flow**

#### **Y.2.1 Use Cases**

*Change referenced section numbering when merged into technical framework*

- 290 For applicable use cases see Perinatal Workflow section X.2.1.

#### **Y.2.2 Diagrams**

*Change referenced section numbering when merged into technical framework*

- For applicable diagrams see Perinatal Workflow section X.2.2.

### **Y.3 Actors/Transactions**

- 295 There are two actors in this profile, the Content Creator and the Content Consumer. Content is created by a Content Creator and is to be consumed by a Content Consumer. The sharing or transmission of content from one actor to the other is addressed by the appropriate use of IHE profiles described below, and is out of scope of this profile. A Document Source or a Portable Media Creator may embody the Content Creator Actor. A Document Consumer, a Document Recipient, or a Portable Media Importer may embody the Content Consumer Actor. The sharing or transmission of content or updates from one actor to the other is addressed by the use of appropriate IHE profiles described in the section on Content Bindings with XDS, XDM and XDR in PCC TF-2:4.1.
- 300

305

**Figure Y.3-1 Actor Diagram**

### **Y.3.1 Requirements of Actors**

## **Y.4 Options**

- 310 Options that may be selected for this Content Profile are listed in the table Y.4-1 along with the Actors to which they apply. Dependencies between options when applicable are specified in notes.

**Table Y.4-1 Antepartum Laboratory Options**

Actor	Option	Section
Content Consumer	View Option (See Note 1) Document Import Option (See Note 1) Section Import Option (See Note 1) Discrete Data Import Option (See Note 1)	PCC TF-2: 3.1.1 PCC TF-2: 3.1.2 PCC TF-2: 3.1.3 PCC TF-2: 3.1.4
Content Creator	No options defined	

315

Note 1: The Actor shall support at least one of these options.

## **Y.5 Groupings**

## **Y.6 Security Considerations**

## **Y.7 Content Modules**

- 320 There are no content module mappings for Antepartum Laboratory as XD-LAB profile is referenced in full.

*Add Section Z*

## Z Antepartum Education Content Profile (APE)

325

*Change referenced section numbering when merged into technical framework*

Antepartum Education is a content profile that provides the document structure to represent educational material provided during the office visit(s) for the antepartum episode.

### Z.1 Purpose and Scope

*Change referenced section numbering when merged into technical framework*

330

Obstetric patients in labor and admitted to Labor and Delivery must have a complete summary of their antepartum ambulatory care available at the time of admission. While this profile represents a portion of that data and may be included with other antepartum care documents to make up a patient's Antepartum Record, it may also be created as a stand alone document and may be transmitted separately from those other antepartum care documents. For further information on the full Perinatal Workflow overview and use cases see Perinatal Workflow section X.1.2 and section X.2.

335

### Z.2 Process Flow

#### Z.2.1 Use Cases

340

*Change referenced section numbering when merged into technical framework*

For applicable use cases see Perinatal Workflow section X.2.1.

#### Z.2.2 Diagrams

*Change referenced section numbering when merged into technical framework*

For applicable diagrams see Perinatal Workflow section X.2.2.

345

### Z.3 Actors/Transactions

There are two actors in this profile, the Content Creator and the Content Consumer. Content is created by a Content Creator and is to be consumed by a Content Consumer. The sharing or transmission of content from one actor to the other is addressed by the appropriate use of IHE profiles described below, and is out of scope of this profile. A Document Source or a Portable Media Creator may embody the Content Creator Actor. A Document Consumer, a Document Recipient, or a Portable Media Importer may embody the Content Consumer Actor. The sharing or transmission of content or updates from one actor to the other is addressed by the use of appropriate IHE profiles described in the section on Content Bindings with XDS, XDM and XDR in PCC TF-2:4.1.

355

### **6.3.1.A.5 Conformance**

415 CDA Release 2.0 documents that conform to the requirements of this content module shall indicate their conformance by the inclusion of the appropriate <templateId> elements in the header of the document. This is shown in the sample document below. A CDA Document may conform to more than one template. This content module inherits from the [History and Physical](#) content module, and so must conform to the requirements of that template as well, thus all <templateId> elements shown in the example below shall be included.

```

510     Add section 6.3.1.B

### **6.3.1.B Antepartum Summary Specification 1.3.6.1.4.1.19376.1.5.3.1.1.11.2**

The Antepartum Summary represents a summary of the most critical information to an antepartum care provider regarding the status of a patient's pregnancy. This document content module is a Medical Summary and inherits all header constraints from Medical Summary (1.3.6.1.4.1.19376.1.5.3.1.1.2).

#### **6.3.1.B.1 Format Code**

The XDSDocumentEntry format code for this content is **urn:ihe:pcc:aps:2007**

#### **6.3.1.B.2 LOINC Code**

The LOINC code for this document is **57055-6** Antepartum summary

### 6.3.1.B.4 Specification

This section references content modules using Template ID as the key identifier. Definitions of the modules are found in either:

- IHE Patient Care Coordination Volume 2: Final Text
  - IHE PCC Content Modules 2010 Supplement
- 525

**Table 6.3.1.B.4-1 Antepartum Summary Specification**

Template Name	Opt	Section Template Id / Location	Value Set Template Id
<a href="#">Allergies and Other Adverse Reactions</a> This section is the same as for Medical Summary, however it SHALL include one observation of Latex Allergy which may be negated through the negationInd attribute. Latex Allergy is particularly relevant for Obstetrics because of the frequency of vaginal exams that might involve the use of latex gloves. The observation value code for Latex Allergy is '300916003'. The codeSystem is '2.16.840.1.113883.6.96'. The codeSystemName is 'SNOMED CT'	R	1.3.6.1.4.1.19376.1.5.3.1.3.13 IHE PCC 2:6.3.3.2.11	
<a href="#">Advance Directives</a> APS includes an explicit check of patients preference for blood transfusion because the risk of massive hemorrhage during delivery is much higher. This observation SHALL be recorded in the Advance Directives section. A simple observation of "blood transfusion acceptable?" SHALL be included with the value '(xx-bld-transf-ok)'. The codeSystem is '2.16.840.1.113883.6.1'. The codeSystemName is 'LOINC'	R	1.3.6.1.4.1.19376.1.5.3.1.3.34 IHE PCC 2:6.3.3.6.5	

IHE Technical Framework Supplement – Antepartum History and Physical (APHP), Antepartum Summary (APS), Antepartum Laboratory (APL), Antepartum Education (APE)

Template Name	Opt	Section Template Id / Location	Value Set Template Id
<u>Care Plan</u> APS forms SHOULD include an observation stating if an anesthesia consult is planned. When present, the observation value for this observation is '(xx-anest-cons-pland)'. The codeSystem is '2.16.840.1.113883.6.1'. The codeSystemName is 'LOINC'. If the type of anesthesia planned is known, systems SHOULD include an observation to represent that data using the LOINC code '(xx-type-of-anest-pland)' with a CD value including one of the following values: ( General   Epidural   Spinal ) or a Null flavor to represent unknown or not listed.	R	1.3.6.1.4.1.19376.1.5.3.1.3.31 IHE PCC 2:6.3.3.6.1	
<u>Medications</u> Medications should include start and stop date if known.	R	1.3.6.1.4.1.19376.1.5.3.1.3.19 IHE PCC 2:6.3.3.3	
<u>Active Problems</u> Related Plans should be included in the Care Plan section.	R	1.3.6.1.4.1.19376.1.5.3.1.3.6 IHE PCC 2:6.3.3.2.3	
<u>Estimated Delivery Date</u>	R	1.3.6.1.4.1.19376.1.5.3.1.1.11.2.2. 1 PCC TF Supplement CDA Content Modules (TI) Vol 2: 6.3.3.2.28

Template Name	Opt	Section Template Id / Location	Value Set Template Id
		Modules (TI) Vol 2: 6.3.3.5.5.7	

530 Note: The Antepartum Summary is typically used as a 'living document' where the latest information is added to the end of the flowsheet at each visit. This is different than a typical Medical Summary which typically would not share information until document is complete. Although this pattern of updates is not prohibited by Medical Summary, it is also not typical. For APS documents may be published at the end of each visit, but subsequent updates with a pregnancy SHALL be represented as document replacement by including a <relatedDocument typeCode='REPL'> element as below.

535     <ClinicalDocument xmlns='urn:hl7-org:v3'>  
      :  
      <relatedDocument typeCode='REPL'>  
        <parentDocument>  
          <id root=' ' extension=' '/>  
        </parentDocument>  
      </relatedDocument>  
      :  
    </ClinicalDocument>

540

625

### **6.3.1.C Antepartum Laboratory Specification 1.3.6.1.4.1.19376.1.5.3.1.1.16.1.2**

The Antepartum Laboratory SHALL follow all constraints as defined in the XD-LAB profile, as described in [LAB TF-3:4](#). There is a suggested code list provided in the [Antepartum Laboratory Value Set](#). Due to the variation possible in these laboratory results, and the potential for new codes representing new types of laboratory data, a tightly constrained code list is not provided.

630

#### **6.3.1.C.1 Format Code**

### 6.3.1.D.5 Conformance

CDA Release 2.0 documents that conform to the requirements of this content module shall indicate their conformance by the inclusion of the appropriate <templateId> elements in the header of the document. This is shown in the sample document below. A CDA Document may conform to more than one template. This content module inherits from the [Medical Documents](#) content module, and so must conform to the requirements of that template as well, thus all <templateId> elements shown in the example below shall be included.
