Date: July 25, 2012

Author: IHE Cardiology Technical Committee 2012-2013

Email: cardio@ihe.net

25

Foreword

This is a supplement to the IHE Cardiology Technical Framework V4.0. Each supplement undergoes a process of public comment and trial implementation before being incorporated into the volumes of the Technical Frameworks.

30   This supplement is published for Trial Implementation on July 25, 2012 and may be available for testing at subsequent IHE Connectathons. The supplement may be amended based on the results of testing. Following successful testing it will be incorporated into the Cardiology Technical Framework. Comments are invited and may be submitted at http://www.ihe.net/cardiology/cardiologycomments.cfm.

35   This supplement describes changes to the existing technical framework documents and where indicated amends text by addition (**bold underline**) or removal (**bold strikethrough**), as well as addition of new sections introduced by editor's instructions to "add new text" or similar, which for readability are not bolded or underlined.

"Boxed" instructions like the sample below indicate to the Volume Editor how to integrate the
40   relevant section(s) into the relevant Technical Framework volume:

Replace Section X.X by the following:

General information about IHE can be found at: www.ihe.net

Information about the IHE Cardiology domain can be found at:
45   http://www.ihe.net/Domains/index.cfm

Information about the structure of IHE Technical Frameworks and Supplements can be found at: http://www.ihe.net/About/process.cfm and http://www.ihe.net/profiles/index.cfm

The current version of the IHE Technical Framework can be found at: http://www.ihe.net/Technical_Framework/index.cfm

Introduction to this Supplement

180 This Supplement introduces a new Profile to the IHE Cardiology Technical Framework, with the overall design in Volume 1 and specific content in Volume 3. This Profile relies heavily on Content Profile concepts specified in the IHE Patient Care Coordination Technical Framework and CDA templates specified in the HL7 Implementation Guide for CDA Release 2: IHE Health Story Consolidation, Release 1 DSTU (December 2011) (C-CDA).

185 This content profile is motivated by cardiologists, who face an increasing demand from patient-care, data-quality and legislative perspectives to increase the usefulness and actionability of (discrete) clinical data across the various care-settings and stakeholders.

A solution for such interoperability is, however, not a simple undertaking. Unstructured textual data forms remains the predominate mechanism for information exchange among health care
190 providers, and a good majority of data needed by physicians and other health care providers to make good clinical decisions is embedded in this free text. Efficient and effective interoperability therefore begins by identifying the most relevant clinical data.

Clinically-relevant Cardiac Cath lab data is the key value proposition of this profile. The approach is to:

195 1. reuse the distribution and structuring work from the XDS (ITI domain), Medical summaries (PCC domain), and the HL7 Implementation Guide for CDA Release 2: IHE Health Story Consolidation, Release 1 DSTU (C-CDA) for exchangeable procedure notes (HL7/IHE)
2. extend it through adding and codifying the ACC-NCDR Cath/PCI dataset and the ACC
200 NCDR Cath/PCI version 4.4 to clinical data standards like ICD9/10,Snomed and LOINC
3. evaluate it as it applies to the work in progress by the ACC and AHA to create an "ACCF-AHA Cardiac Cath Reporting – Report template"

The aim is to enable collection and distribution of the most clinically-relevant discrete data on
205 the cardiac catheterization procedures common in cardiology. The usage of the discrete data is three-fold:

1. To enable individual Cath/PCI procedures to be more easily shared and used between care givers and systems
2. To enable population-based outcomes-based research on procedure effectiveness
210 3. To provide the ability to interact with data registries for data exchange.

These Cath/PCI procedures are used as key constituents of the patient's treatment during cardiac encounters and disease management. Allowing a means to extract and exchange key cardiac measures across providers and their systems will be a huge advantage to providing a complete, accessible and actionable cardiac data set in front of cardiologists.

215   There are very successful quality-improvement programs in place by the professional bodies such as the ACC, AHA, and state registries concentrating on the most invasive, and expensive cardiac procedures. However, the effort in translating and extracting the discrete data required by these registries still involves significant manual work and inefficiencies due to the absence of a standardized structuring of information at the point of clinical reporting.

220   This supplement provides a framework to make progress in these areas. This profile codifies representative areas of procedure indications, procedures, medications, observations, complications and findings for invasive cardiac procedures and specifies how this discrete data can be organized to be used by both care-providers and automated data processing systems.

225 Relationship to Workflow Profiles

Cath Report Content (CRC) is a *content* profile – it is agnostic with respect to the workflow or data exchange mechanism in which the data is produced and handled.

Content Profiles define how the content used in a transaction is structured. The binding of the Content to an IHE transaction that is part of an IHE Workflow Profile specifies how this payload
230   may influence the metadata or the behavior of the transaction. Content modules within the Content Profile then define the payloads. Content modules are transaction neutral, in that what they describe is independent of the transaction in which they are used, whereas content bindings explain how the payload influences the transaction metadata and/ or behavior.

The CRC content is intended to be deployed, for example in the Displayable Reports (DRPT)
235   workflow profile for in-patient environments, or the Cross-Enterprise Document Sharing (XDS) profile to propagate the content across organizational boundaries.

It is important to note that that key report-generation/distribution workflow aspects such as physician identification, insurance preauthorization, report routing and acknowledgement, and patient consent, are **__out of scope__** for this Content Profile.

240

Cardiac Cath Report Content (CRC) Profile

The Cardiac Cath Report Content (CRC) Profile specifies the content structure for a clinical report of a Cardiac Cath imaging exam, recorded in a DICOM Study. Such exams include:

- Diagnostic Cath
245
- Angiography

- PCI

The CRC Profile specifies the use of an HL7 Clinical Document Architecture (CDA) format for the report. This format supports both the human readable narrative historically used for clinical reports, as well as a substantial set of discrete data elements that may be used for longitudinal or 250 population analysis or other computer processing.

> Note: It is expected that future evolution of cardiology reporting will incorporate more robust and extensive sets of data elements. This Profile is a first step beyond simple narrative to interoperable discrete data elements.

Not included in the scope of this profile are electrophysiology procedures, and non-cardiology procedures (e.g., peripheral angiography). Pediatric Cath cases are also excluded. Such use cases 255 may be supported by other similar content profiles.

It is assumed that there is a DICOM Study associated with the exam. If there is not a DICOM Study, this report content may not be appropriate. In addition to reference images, the DICOM Study data may include discrete data elements encoded in DICOM Structured Report information objects that may be transcoded into the discrete data elements specified in this 260 Profile. (See the Evidence Documents Profile and its cardiology options in Section 7.)

The CRC Profile does not presume to describe the complete content of a cardiac catheterization laboratory report. It does provide the framework of high level section titles and a set of discrete data elements. Within that framework reports can be created with the clinical content desired by their authors, including additional discrete data elements. In general, there are no constraints on 265 the narrative text and figures that the cardiologist could include in the report document, although there are requirements on minimum data elements reflecting expert consensus (ACC-NCDR Cath/PCI, ACCF-AHA Cardiac Cath Reporting workgroup).

This profile also does not provide all of the details necessary to construct a CDA compliant document. Please refer to the HL7 CDA Release 2 Standard.

270

Open Issues and Questions

#	Open Issue Description
2	Generally, certain concepts represented by SNOMED compositions have been submitted for pre-coordinated codes. In CIRC, compositional coding was used to represent some concepts and there are still some in this profile. Requests were submitted to SNOMED for pre-coordinated codes that represent these compositions with a single code and we're

---

_____

#	Open Issue Description
	waiting for these single codes to be provided by SNOMED. A: There is a need for one code (mid right coronary artery)– and it should be available in July 2012. This issue will remain open until the code is available.
38	Depth vs. breadth presentation of sections and entries – the sections and entries are presented in Volume 3 per the order they are included in a clinical CRC report (as an instance of a CRC CDA document) (depth view) rather than organizing the sections by listing them ordered alphabetically and having the complete set of entries used within this document organized in a separate list ordered alphabetically (breadth view). Is this approach useful or preferred vs. the breadth approach?

Closed Issues

#	Closed Issue Description/ Resolution
1	*Which document do we use on which to base this profile,* HL7 Consolidated CDA DSTU or the IHE_CARD_Suppl_CIRC_Rev1.1_TI 2011-06-24 content profile. A: The committee agreed to use the HL7 Implementation Guide for CDA Release 2: IHE Health Story Consolidation, Release 1 DSTU (Dec 2011 edition).
2a	Need to handle multiple performers for header, including authors and legal authenticators. A: Header either has allowances for multiple performers and has been expanded to include multiple authors and authenticators as need but is limited to a single legal authenticator as constrained by CDA.
3	How do we associate medical equipment with Procedures. A: Medical devices are described in the Procedures Description Cardiac Section.
4	What to do with US realm race code(7263), ethnicity(5323), do we really need race or ethnicity? A: All US realm specifics should be reflected in section (or Volume?) 4 of this content profile which will be done at a later date.
5	How do we associate procedures and findings, particularly coronary segments? A: We are using a Lesion ID (as an instance of a result observation "id") to link findings to procedures. The Lesion ID is associated with a coronary segment.
6	In medical history, do we need past and present illness? A: NO. The ACCF-AHA Cardiac Cath Reporting - ReportTemplate does not separate illness by past and present, and committee experience shows no real reason to separate these out, especially since there is an allowance to record if a problem is active in the Medical History Section.

_____

_____

#	Closed Issue Description/ Resolution
7	How do we record more than one piece of information for a data concept, like a table format versus straight text in the rendered report? A: We can have structured elements in the coded data and if these elements appear in the narrative, they must be accurately rendered. In the narrative text, any valid HTML markup can be used, including markup used to render a table in HTML.
8	Q - Does the text narrative for every CDA construct need to completely contain the full coded content. A: If the ACT relationship is DRIV, then the narrative is based solely on the coded content. But does this need to include all the coded content? Technically it is not required, but all coded content SHOULD be included in the narrative. There SHALL be no conflicts between the narrative and the coded content. The coded content may not be an equivalent of the narrative. This has been added as a note in section 6.3.1.4 (Conventions).
8a	What do we do with data fields that have coded values potentially cover multiple Snomed codes, for example New York Class and Angina Class. A: We can use multiple SNOMED codes to describe the value needed based on CCDA.
9	CIRC has an Indications and Planned Procedure section and CCDA separates these into separate sections. A: We have adopted the C-CDA approach and will have a separate Procedure Indications Section and a Planned Procedure Section.

10	Some of these concepts identified in the NCDR CathPCI Registry v4.4 Coder's Data Dictionary do not seem to be "Yes/No" valued. Do they belong in the Complications section?
	
	A: No, only concepts that are SNOMED CT "findings" should be included in this section. This also includes disorders (which are also findings).
	   a. Concepts that are procedures should be included in other sections
	   b. Items that are measurements should be associated with the appropriate procedures
	   c. If there are appropriate findings concepts for these procedures, these will be included in the complications list
	       i. Renal failure
	      ii. Anemia due to blood loss

11	Is there a need to create a specialization of the Problem Observation entry to reflect that there will not be either a Health Status entry or an Age Observation entry? A: We created a specialization of the problem observation entry to also include severity so we can set the cardinality of these other entries as needed for this specific use.

_____

#	Closed Issue Description/ Resolution
12	Is this content profile for US realm only or for Universal realm? A: This CRC profile is realm agnostic and could be further extended for US-realm, Universal realm or any national extension.
13	How do we link Procedure Findings.Result Observation and Procedures.Procedure Activity Procedure entries? A: There is a new lesion ID which is intended to be used to link a Procedure Findings.Result Observation and Procedures.Procedure Activity Procedure entries which are for the same lesion.
14	Q - Can we use the segmental wall analysis, from IHE_CARD_Suppl_CIRC_Rev1.1_TI 2011-06-24 in a revised format to fit drawings from ACCF-AHA Cardiac Cath Reporting - ReportTemplate and other drawings performed by vendors? A: Yes, it is possible to include graphical representations (e.g., drawings) of coronary anatomy and segmental wall analysis to be embedded in the CDA document to be either embedded in-line or referenced via a URL. These are allowed at the document summary level.
15	Q - Which document content section should be used to record bruits(femoral,carotid)? A: These are recorded in the Vital Signs Section, see Value Set 1.3.6.1.4.1.19376.1.4.1.5.36
16	Q - Do we need an anesthesia section (e.g., for aortic valve replacement done in cath lab under general anesthesia) ? A: We have the ability to record Local anesthetics and sedation administration in the Medications Administered Section if needed and have included an Anesthesia section to handle all other types of anesthesia
17	Q - The ACCF-AHA Cardiac Cath Reporting - ReportTemplate shows ICD9 coding sections for both pre and post diagnosis. How are postprocedure diagnoses determined and are the ICD-9 codes actually available at the time of producing this procedure note? A: After discussion, it was determined that some systems will have this information available at the time of the Procedure Note, so we have included language in preprocedure and postprocedure diagnosis to allow the inclusion of ICD9 coding.

_____

#	Closed Issue Description/ Resolution
18	If grafts were performed, the ACC coding only requires stenosis to be recorded for each of these systems. In the real world, a methodology should be used that uniquely identifies a graft and its related stenosis which can then be used for both Cath Lab and OR cardiac procedures. Q – do you agree?, and is this addressed in the ACCF-AHA Cardiac Cath Reporting – ReportTemplate? A: The ACCF-AHA Cardiac Cath Reporting – ReportTemplate does not reflect grafts in the samples but discussion centered on including graft descriptions that include an origin, type of conduit, and insert site. This has been allowed for by including these descriptions in text format by the Content Creator as part of the narrative for the Procedure Description Section (or any other section).
19	Q - In the Medical History section, is "health status observation" for the patient required or used? Or is "problem status" sufficient for each problem observation? A: C-CDA 1.1 provides a new value set for health status observation that is meaningful. For this initial CRC version, this will be available for use, if needed/desired.
19a	Q – can we have a shared single code for identifying cath and PCI document types? A: We have adopted Cath, PCI, and Cath/PCI document types for this content profile.
20	In the Medical History Section, should prior procedures be moved to the history section of Procedures. Logically they fit in this section but CCDA has a section for history in the procedures area. Q – does it make most clinical sense to put prior procedures in the medical history section of the report? A: Prior procedures have been included in the Medical History section.
21	Q – is there a good source of Cath Procedure Findings you can recommend? A: We have created a list of Procedure Findings that is extensible, which means it can be expanded as needed.
22	Q - Is this the complete set of complications that should be included in this profile? Are there other specific complications that should be added?(Complication Section)? A: We have included ACC-NCDR Cath/PCI complication values as a starting point in this extensible table. Expansion to other complications is at the Content Creator's discretion.
23	Q -Is There a need for the Procedures Specimens Taken section? A: Yes, the Section has been added and is based on the C-CDA definition. It can be used to handle biopsy and other specimens.

_____

#	Closed Issue Description/ Resolution
24	Q - Is there a need for the Procedure Implants section?
	A: No. This is required for EP and is out of scope for this CRC profile.
25	Q - For the Medical History section, is there a need to identify the "severity" of the problem?
	A: Yes, possibly so we have added a "Severity Observation" entry to the Problem Observation entry in this section.
26	We are working with draft documents from the ACCF-AHA Cardiac Cath Reporting - ReportTemplate. We will need to revise our profile when this document is final.
	Q - When is expected completion?
	A: Per discussions at the PC F2F @ACC it will be available in 6 months from 3/25/2012.
27	Q - How is Hematoma size best represented clinically ? This is not a complication but could be related to a complication.(Complication Section)
	A: This should be treated a result observation related to the particular Problem Observation in the Complication Section. This is out of scope for this profile version.
28	Vol 1 - Section 12.3.1 – Should there be a binding to the IEO profile? Technically there could be a binding to IEO, but practically it is questionable. IEO is targeted for cardiology practice offices.
	A:This profile is not targeted for the ambulatory setting so there should not be a binding to the IEO profile. Text referencing IEO has been removed.
29	Need to remove C-CDA sections/entries that are unchanged. Also need to harmonize definitions of entries across sections within this profile.
	A: Done
30	Need to assign IHE Card specific template IDs for new/changed entries and vocabulary constraints. Entries highlighted in table 6.3.3-1 need IHE Card specific template IDs.
	A: New template IDs were created for the CRC specific sections and entries.
31	Need better xml samples for all sections/entries. It would be useful to create XML of a complete sample report.
	A: Done
32	IVUS/IVOCT procedures are mention in the intro section as being in scope. No specific measurements are described elsewhere in the content specification. Should there be additional specific measurements for IVUS/IVOCT or should the intro section be modified to remove this from the scope for this profile?
	A:Removed references to IVUS/IVOCT from this specification. It is believed that

#	Closed Issue Description/ Resolution
	support for IVUS/IVOCT requires additional vocabulary which could be added (via a CP) after complete analysis is done.
33	Need to assign unique constraint IDs to CRC specific constraints. A: This will be done by tooling from MDHT (when available) as part of the CDA template development process.
34	The intention is to have the CRC specific vocabulary sets be extensible and also not be based on a specific version of the vocabulary standard (e.g., SNOMED). This profile specifies all the CRC specific vocabulary sets as STATIC. The value sets can be extended where they are designated for use for a specific element specified as a CWE data type.
35	There are problems with C-CDA specification that should be submitted to HL7 and addressed by HL7. Need to compile list of these problems and IHE Card will submit them. A: A list of C-CDA errata was developed and submitted to HL7.
36	Q: Should the cardinality for Legal Authenticator be [0..1] or [1..1]. A:[1..1] because this profile does not support the exchange of preliminary unapproved reports (non – legally authenticated).
37	There is no code in Table 6.3.6.11 selected for Antiarrhythmics: Azimilide A: this is a general class 3 Antiarrhythmics (potassium channel antagonist), but no specific code was found. This entry was removed from the table.

275

Volume 1 – Profiles

12 Cath Report Content Profile (CRC)

280 The Cath Report Content (CRC) Profile specifies the content structure for a clinical report of a cardiology procedure recorded in a Cardiac Cath Lab. Such procedures include:

- Diagnostic Cath
- Angiography
- PCI

285 The CRC Profile specifies the use of an HL7 Clinical Document Architecture (CDA) format for the report.

Not included in the scope of this profile are imaging studies (e.g., echocardiography), electrophysiology procedures, and non-cardiology procedures (e.g., peripheral angiography). Such use cases may be supported by other similar content profiles.

290 This profile also does not provide all of the details necessary to construct a CDA compliant document. Please refer to the HL7 CDA Release 2 Standard.

12.1 CRC Actors, Transactions, and Content Modules

Figure 12.1-1 shows the actors directly involved in the CRC Profile and the relevant transactions between them. There are two actors in this profile, the Content Creator and the Content Consumer. Content is created by a Content Creator and is to be consumed by a Content
295 Consumer. The sharing or transmission of content from one actor to the other is addressed by the appropriate use of other IHE profiles, and is out of scope of this profile; hence there is no transaction per se defined for this profile.

Figure 12.1-1: Cath Report Template Actor Diagram

300   Note: The primary intended transmission mechanism in the intra-institutional context is the IHE Displayable Reports Profile (DRPT), and in the inter-institutional context the IHE Portable Data for Imaging (PDI) or IHE Cross Enterprise Document Sharing Profiles (XDS, XDM, and XDR). A Report Creator, Document Source or a Portable Media Creator of those profiles may embody the Content Creator Actor. A Document Consumer, a Document Recipient or a Portable Media Importer may embody the Content Consumer Actor.

305 **12.1.1 Actor Descriptions and Actor Profile Requirements**

12.1.1.1 Content Creator

1. A Content Creator shall be able to create a Cardiac Cath Lab Report Document according to the specifications for that content profile found in CARD TF-3.
2. A Content Creator shall be grouped with the Time Client Actor, and shall synchronize
310   its clock with a Time Server.

12.1.1.2 Content Consumer

1. A Content Consumer shall be able to consume (receive and process) a Cardiac Cath Lab Report document.
2. A Content Consumer shall implement the View Option or Discrete Data Import option,
315   or both.
3. A Content Consumer that implements the Document Import or Section Import Option shall implement the View Option as well.
4. A Content Consumer that implements the View option shall be able to:

    a. Demonstrate rendering of the document for display.

320   b. Print the document.

    c. Display the document with its original style sheet.

    d. Support traversal of any links contained within the document.

5. A Content Consumer that implements the Document Import Option shall:

    a. Store the document.

325   b. Demonstrate the ability to access the document again from that storage.

6. A Content Consumer that implements the Section Import Option shall offer a means to import one or more document sections into the patient record as free text.
7. A Content Consumer that implements the Discrete Data Import Option shall offer a means to import structured data from one or more sections of the document.

330 **12.2 CRC Actor Options**

Options that may be selected for this Content Profile are listed in Table 12.2-1 along with the Actors to which they apply. Dependencies between options when applicable are specified in notes.

Table X.2-1: CRC Profile Options

Actor	Option Name	Optionality	Section
Content Consumer	View Option	O (see 12.2.1)	PCC TF-2 :3.1.1
	Document Import Option	O (see 12.2.1)	PCC TF-2 :3.1.2
	Section Import Option	O (see 12.2.1)	PCC TF-2 :3.1.3

Actor	Option Name	Optionality	Section
	Discrete Data Import Option	O (see 12.2.1)	PCC TF-2 :3.1.4
Content Creator	*No options defined*		

335

12.2.1 Content Consumer Options

The Content Consumer actor is required to support at least one of the View or Discrete Data Import options. The Document Import and Section Import options, if implemented, also require the View option. These options as specified in the PCC Technical Framework assume use of
340 XDS or related profiles for transport; this Profile specifies bindings to other workflow profiles (see Section 12.5), and these options should be interpreted as applicable with any binding. See also Section 12.6.2.

12.3 CRC Actor Required Groupings

The Content Creator shall be grouped with Time Client actor of the IHE IT Infrastructure
345 Consistent Time Profile, as specified in ITI TF-1:7. This allows the Legal Authentication timestamp to be accurate.

Content modules describe the content of a payload found in an IHE transaction. Content profiles are transaction neutral. They do not have dependencies upon the transaction that they appear in.

12.4 CRC Document Content Module

350 There is often a very clear distinction between the transactions in a messaging framework used to package and transmit information, and the information content actually transmitted in those messages. This is especially true when the messaging framework begins to move towards mainstream computing infrastructures being adopted by the healthcare industry.

In these cases, the same transactions may be used to support a wide variety of use cases in
355 healthcare, and so more and more the content and use of the message also needs to be profiled, sometimes separately from the transaction itself. Towards this end IHE has developed the concept of a Content Profile.

Content Profiles specify how the payload of a transaction fits into a specific use of that transaction. A content profile has three main parts. The first part describes the use case (this is
360 found in Volume 1 in the definition of each Profile). The second part is a Content Module (found in this Volume 3), which describes the payload of the transaction; a content module is specified so as to be independent of the transaction in which it appears. The third part is binding to a specific IHE transaction, which describes how the content affects the transaction. The binding of CDA-based medical documents to workflow transactions is described in the Profile definition in
365 Volume 1 (e.g., see IHE CARD TF-1:12.7).

12.5 CRC Overview

The Cardiac Cath Lab Report Content (CRC) Profile specifies the content structure for a clinical report of a cardiology Cath Lab Visit. Such procedures include:

- Diagnostic Cath

370
- Angiography

- PCI

The CRC Profile specifies the use of an HL7 Clinical Document Architecture (CDA) format for the cath physician clinical report. This format supports both the human readable narrative historically used for clinical reports, as well as a substantial set of discrete data elements that

375 may be used for longitudinal or population analysis or other computer processing.

> Note: It is expected that future evolution of cardiology reporting will incorporate more robust and extensive sets of data elements. This Profile is a first step beyond simple narrative to interoperable discrete data elements.

Not included in the scope of this profile are imaging studies, ECG, electrophysiology procedures, and non-cardiology procedures (e.g., peripheral angiography). Such use cases may be supported

380 by other similar content profiles. This profile does not address how discrete data is collected and transmitted for registry data collection and other secondary usages.

It is assumed that there is a DICOM Study associated with the exam. If there is not a DICOM Study, this report content may not be appropriate. In addition to reference images, the DICOM Study data may include discrete data elements encoded in DICOM Structured Report

385 information objects that may be transcoded into the discrete data elements specified in this Profile. (See the Evidence Documents Profile and its cardiology options in Section 7.)

The CRC Profile does not presume to describe the complete content of an imaging study report. It does provide the framework of high level section titles and a set of discrete data elements. Within that framework reports can be created with the clinical content desired by their authors,

390 including additional discrete data elements. In general, there are no constraints on the narrative text and figures that the cardiologist could include in the report document, although there are requirements on minimum data elements reflecting expert consensus (ACC-NCDR Cath PCI data elements)

This profile also does not provide all of the details necessary to construct a CDA compliant

395 document. Please refer to the HL7 CDA Release 2 Standard.

12.5.1 Concepts

Not Applicable

12.5.2 Use Case #1: Compile and Transfer Report of Cardiac Cath Lab Procedure with Use of ACC-NCDR Cath/PCI Data Elements

---

18

400 **12.5.2.1 Compile and Transfer Report of Cardiac Cath Lab Procedure with Use of ACC-NCDR Cath/PCI Data Elements Use Case Description**

This use case addresses the generation and transfer of a cardiac cath lab report based on the NCDR CathPCI Registry v4.4 Coder's Data Dictionary data elements (see http://www.ncdr.com/WebNCDR/NCDRDocuments/CathPCI_v4_CodersDictionary_4.4.pdf).

405 The initial content, structure and coding of the report to support this use case are detailed as part of this profile (see IHE CARD TF-3: 6 Content Modules). However various reporting system implementations, institute reporting guidelines and individual Reporting Physician usage may result in some variability in the specific report content provided.

12.5.2.2 Compile and Transfer Report of Cardiac Cath Lab Procedure with Use of
410 **ACC-NCDR Cath/PCI Data Elements Process Flow**

Pre conditions

The systems underlying the data collection and management for the various elements of the procedure report have all the *mandatory* data elements identified using codes, and are expected to be the source for the information used in creating the *majority* of the structured cath lab report
415 document.

Main Flow

- Cardiologist reviews and/or records the codified
    - o procedures and protocols used in the procedure
    - o Data generated from the various modalities and monitoring equipment used during the
420 procedure so that the key physiological measures, acquired and derived (pre, during and post intervention) are present in line with the ACC-NCDR Cath/PCI guidelines.
    - o Other relevant patient characteristics
    - o Medications documented for the patient both pre and during procedure.
    - o Equipment used and implanted in the patient
425 - o Indications and observations/complications noticed during the procedure.
    - o Findings, assessment and plan
- Cardiologist approves the procedure report and this marks it ready for distribution
- The content creator system will format the report appropriately (this profile) and send it via one of the IHE mechanisms to a content consumer system (an appropriate workflow profile).

430 **Post conditions**

The subsequent clinical stakeholder (system) receives the Document for import, processing and optionally viewing of the data.

12.5.3 Use Case #2: Perform Discrete Data-analysis on Procedure Report Content

12.5.3.1 Perform Discrete Data-analysis on Procedure Report Content Use Case Description

The goal of this use case is to assist data collection for comparative and research purposes. Based on a report generated in the previous use cases an advanced medical data analysis system collects discrete data from multiple patients and their procedure, e.g., for cardiac Clinical Decision Support or for advanced lifetime patient records.

12.5.3.2 Perform Discrete Data-analysis on Procedure Report Content Process Flow

Pre conditions

The content consumer (e.g., an advanced medical data analysis system) received a Cardiac Cath Lab Report with coded/structured content as defined in IHE CARD TF-3: 6 CDA Release 2 Content Modules.

Main Flow

The consuming system collects and processes the data from the various reports it receives and extracts those relevant data for either:

- A specific clinical concern for a population e.g., pre-populating a procedure-specific registry; extracting a data subset for a specific research question.

- A more comprehensive longitudinal patient record (e.g., an EMR) which can provide trending over time on an individual patient's key cardiac measures.

Post conditions

The content consumer generated new (derived) data for use by others. The type of data generated is out of the scope of this *profile.*

12.5.4 Use Case #3: Review Procedure Report

12.5.4.1 Review Procedure Report Use Case Description

A secondary use-case addressed by this profile involves the direct human use of the procedure report. In most practical cases this will be:

- The referring physician who instigated/ordered the procedure, and other healthcare providers who manage subsequent patient care activities

- Another person involved in downstream clinical or administrative data processing e.g., someone validating/source-checking for QA the original report as part of JCAHO audits, or pre-submission checking on the original reporting data against the case-data imported in the ACC-NCDR Cath/PCI registry-submission application

12.5.4.2 Review Procedure Report Process Flow

Pre conditions

- The Reviewing Physician consumer has a system (EMR or other) capable of importing and displaying the received report in a clinically useful format

470 - The Cath Lab Report has been received at this system

> Note: This profile does not assume any explicitly specified relationship between the creator and consumer.

Main Flow

- The reviewing physician selects the report of his patient and opens it for review
- The system displays the human readable content for the reviewing physician to review

475 **Post conditions**

The Reviewer has extracted (visually) the necessary information from the report.

12.6 CRC Security Considerations

Security considerations are dealt with by the transport mechanism (e.g., XDS, DRPT) and are outside the scope of this content profile. See PCC TF-1: 3.8

480 ## 12.7 CRC Cross Profile Considerations

A Content Creator or Content Consumer should be grouped with appropriate actors from workflow profiles that manage interchange of clinical data. Such groupings are described in this section.

Content profiles may impose additional requirements on the transactions used when grouped
485 with actors from other IHE Profiles. The metadata sent in the document sharing or interchange messages has specific relationships to the content of the clinical document described in the content profile. These mappings between the workflow metadata and the content attributes are described in IHE PCC TF-2:4.

12.7.1 Content Bindings for Displayable Reports (DRPT) Profiles

490 CDA documents using the CRC content may be exchanged between a Report Creator and a Report Manager, as defined in the Displayable Reports (DRPT) Profile using the Encapsulated Report Submission [CARD-7] transaction. In this case, the CRC Content Creator actor is grouped with the DRPT Report Creator actor, and the CRC Content Consumer actor is grouped with the DRPT Report Manager actor.

495 ### 12.7.2 Content Bindings for XDS, XDM, XDR, XDS-I, and XDR-I

It is expected that the transfers of care will occur in an environment where the physician offices and hospitals have a coordinated infrastructure that serves the information sharing needs of this community of care. Several mechanisms are supported by IHE profiles:

- A registry/repository-based infrastructure is defined by the IHE Cross Enterprise Document
500 Sharing (XDS) and other IHE Integration Profiles such as patient identification (PIX & PDQ)

---

and notification of availability of documents (NAV). An extension for imaging study exchange is Cross Enterprise Document Sharing for Imaging (XDS-I).

- A media-based infrastructure is defined by the IHE Cross Enterprise Document Media Interchange (XDM) profile.

505
- A reliable messaging-based infrastructure is defined by the IHE Cross Enterprise Document Reliable Interchange (XDR) profile. An extension for imaging study exchange is Cross Enterprise Document Reliable Interchange for Imaging (XDR-I).

- All of these infrastructures support Security and privacy through the use of the Consistent Time (CT) and Audit Trail and Node Authentication (ATNA) profiles.

510 For more details on these profiles, see the IHE IT Infrastructure Technical Framework, and the IHE Radiology Technical Framework for XDS-I and XDR-I.

Document Source and Document Consumer Actors from the ITI XDS, XDM and XDR profiles are logically grouped with the CRC Content Creator and Content Consumer actors, respectively.

12.7.3 Binding for Portable Data for Imaging (PDI)

515 CDA documents using the CRC content may be exchanged on interchange media in accordance with the Portable Data for Imaging (PDI) profile. Such documents may be encapsulated within DICOM SOP Instances, or may be native CDA documents, as described in the IHE Radiology Technical Framework. In this case, the CRC Content Creator actor is grouped with the PDI Portable Media Creator actor, and the CRC Content Consumer actor is grouped with the PDI
520 Display or Portable Media Importer actors.

12.7.4 Content Binding for Retrieve Form for Data Capture (RFD)

A CDA document may be used for pre-population of a data entry form managed by actors of the Retrieve Form for Data Capture (RFD) Profile. In particular, the CRC content, as a carrier of discrete encoded data, may be used to pre-populate data entry forms for cardiovascular data
525 registries.   The CRC profile has been developed with key data elements that support common research related data fields. This profile, however, does not provide mapping between CRC field content and any specific registry field content. In this case, the CRC Content Consumer actor is grouped with the RFD Form Manager actor for the purpose of extracting discrete data from the report to pre-populate the data capture form.

530 ### 12.7.5 Relationship to Document Digital Signature (DSG)

When a Content Creator Actor needs to digitally sign a document in a submission set, it may support the Digital Signature (DSG) Content Profile as a Document Source. When a Content Consumer Actor needs to verify a Digital Signature, it may retrieve the digital signature document and may perform the verification against the signed document content.

Volume 3 – Content Modules

Add section 6.3

6 Content Modules

6.3 Cath Report Content Modules

6.3.1 Cath Report Content Specification 1.3.6.1.4.1.19376.1.4.1.1.2

555 This is the template for Cardiac Cath/PCI Reports with discrete data elements as described in the NCDR CathPCI Registry version 4.4 Coder's Data Dictionary. The Template ID for conformance to this template is OID = 1.3.6.1.4.1.19376.1.4.1.1.2.

This CDA document is not a direct specialization of any existing CDA document template ID. However, some parts were based on the IHE Card CIRC document specification and the HL7
560 Implementation Guide for CDA Release 2: IHE Health Story Consolidation, Release 1 DSTU - December 2011 (C-CDA) Procedure Note document specification.

6.3.1.1 Format Code

The XDSDocumentEntry format code for this content is **urn:ihe:card:CRC:2012**

The mapping of CDA header attributes to XDS metadata shall be identical to the XDS-MS
565 mapping specified in PCC TF-2: 4.1.1.

6.3.1.2 Relationship to the IHE Cardiology CIRC Profile

This CRC document is inconsistent with the existing Cardiac Imaging Report Content (CIRC) content profile that was published for Trial Implementation in 2011.

These inconsistencies include:

570 • Overall document structure

• This is not based on the IHE PCC section and entry templates but is based on the C-CDA section and entry templates.

6.3.1.3 Relationship to C-CDA

Some CDA section and entries used within this CRC document were based on the HL7
575 Implementation Guide for CDA Release 2: IHE Health Story Consolidation, Release 1 DSTU (C-CDA) section and entry definitions.

a. Where constraints defined in C-CDA were not modified, the constraint remains as the C-CDA constraint identifier (e.g., CONF:5361). If only the value set was modified, then the constraint is considered unchanged.

580 b. Where constraints defined in C-CDA were modified, the original constraint ID is also modified by appending "-CRC" (e.g., CONF:5253-CRC). Modifications could include changes in the cardinality.

    c. Where new constraints were introduced, a new constraint identifier was defined (e.g., CONF:CRC-xxx)

585 If there are no new or modified constraints for a section or entry or if only the value sets are constrained, then the definition of the section or entry is considered unchanged from the C-CDA definition and the C-CDA template Id will be used. These unchanged sections/entries are referenced directly from the C-CDA specification and are not included in this specification.

If there are new or modified constraints for a section or entry, then that section or entry is
590 assigned a new IHE Card specific template Id.

The description of the type of modification to affected section or entry content modules are outlined with boxes.

6.3.1.4 Conventions

6.3.1.4.1 Conformance Terms

595 The definitions of the conformance verbs, the terms *optional* and *required* and the cardinality indicator are as defined in C-CDA Section 1.8 – Conformance Conventions.

6.3.1.4.2 Narrative requirements

There is no general requirement for the section text narrative to completely contain the full coded content of all the elements of the section and its contained entries. However for this profile, it is
600 recommended that all coded content in the section and its contained entries SHOULD be included in the narrative for each section. In any case, there SHALL be no conflicts between the narrative and the coded content.

In the case where the section ACT relationship is specified to be "DRIV" (derived), then the section narrative SHALL be based solely on the coded content. This narrative content SHOULD
605 include as much of the coded content as possible.

The coded content may not be an equivalent of the narrative.

6.3.1.5 Standards

The following table identifies the standards upon which this specification is based.

Table 6.3.1.4-1: Reference Standards

Standard Name (short)	Standard Name (full)	Reference to Published Standard
CathPCI Registry	NCDR CathPCI Registry v4.4 Coder's Data Dictionary	http://www.ncdr.com/WebNCDR/NCDRDocuments/CathPCI_v4_CodersDictionary_4.4.pdf

6.3.2 Cath Report Content Header Element Constraints

The header for the Cardiac Report Content document shall support the following header constraints as noted in this section. Note that this content profile is realm agnostic. These header constraints are based on the C-CDA header constraints but all references to US Realm specific
615   types have been removed.

1. SHALL contain exactly one [1..1] `typeId` (CONF:5361).
   a. This typeId SHALL contain exactly one [1..1] `@root`="2.16.840.1.113883.1.3" (CONF:5250).
620   b. This typeId SHALL contain exactly one [1..1] `@extension`="POCD_HD000040" (CONF:5251).
2. SHALL contain exactly one [1..1] `templateId` (CONF:5252) such that it
   a. SHALL contain exactly one [1..1] `@root`="1.3.6.1.4.1.19376.1.4.1.1.2" for the Cath Report Content document template (CONF:CRC-xxx).
625 3. SHALL contain exactly one [1..1] `id` (CONF:5363).
   a. This id SHALL be a globally unique identifier for the document (CONF:9991).
4. SHALL contain exactly one [1..1] `code` (CONF:5253).
   a. SHALL be selected from ValueSet `ProcedureNoteDocumentTypeCodes`
630   `2.16.840.1.113883.11.20.6.1` DYNAMIC (CONF:8497). Either of the following codes should be included:

Value Set: ProcedureNoteDocumentTypeCodes 2.16.840.1.113883.11.20.6.1 DYNAMIC			
Code System: LOINC 2.16.840.1.113883.6.1			
LOINC Code	Type of Service 'Component'	Setting 'System'	Specialty/Training/Professional Level 'Method_Type'
18745-0	Study report	Heart	Cardiac catheterization
34896-1	Interventional procedure note	{Setting}	Cardiology

28

5. **SHALL** contain exactly one [1..1] `title` (CONF:5254).

   a. Can either be a locally defined name or the display name corresponding to clinicalDocument/code (CONF:5255).

6. **SHALL** contain exactly one [1..1] `effectiveTime` (CONF:5256).

   a. Signifies the document creation time, when the document first came into being. Where the CDA document is a transform from an original document in some other format, the ClinicalDocument.effectiveTime is the time the original document was created. The time when the transform occurred is not currently represented in CDA (CONF:9995).

7. **SHALL** contain exactly one [1..1] `confidentialityCode`, which **SHOULD** be selected from ValueSet HL7 BasicConfidentialityKind 2.16.840.1.113883.1.11.16926 **STATIC** 2010-04-21 (CONF:5259).

```

8. **SHALL** contain exactly one [1..1] `recordTarget` (CONF:5266-CRC). The `recordTarget` records the patient whose health information is described by the clinical document; the clinical document must contain exactly one `patientRole` element.

   a. Such recordTargets **SHALL** contain exactly one [1..1] `patientRole` (CONF:5267).

      i. This patientRole **SHALL** contain at least one [1..*] `id` (CONF:5268)

      ii. This patientRole **SHALL** contain at least one [1..*] `addr` (CONF:5271).

         1. This addr **SHALL** contain at least one [1..*] `postalCode` (CONF:CRC-xxx).

      iii. This patientRole **SHALL** contain at least one [1..*] `telecom` (CONF:5280).

      iv. This patientRole **SHALL** contain exactly one [1..1] `patient` (CONF:5283).

         1. This patient **SHALL** contain exactly one [1..1] `name` (CONF:5284).

            a. This name **SHALL** contain exactly one [1..1] `family` (CONF:7159).

       b. This name **SHALL** contain at least one [1..*] **given** (CONF:7157).

680
        i. The second occurrence of given (given[2]) if provided, **SHALL** include middle name or middle initial (CONF:7163).

      2. This patient **SHALL** contain exactly one [1..1] **administrativeGenderCode**, which **SHALL** be selected from ValueSet Administrative Gender (HL7 V3)

685
      2.16.840.1.113883.1.11.1 **DYNAMIC** (CONF:6394).

      3. This patient **SHALL** contain exactly one [1..1] **birthTime** (CONF:5298).

       a. **SHALL** be precise to year (CONF:5299).

       b. **SHOULD** be precise to day (CONF:5300).

690

```
<recordTarget>
  <patientRole>
    <id extension="12345" root="2.16.840.1.113883.19"/>
    <addr use="HP">
      <streetAddressLine>17 Daws Rd.</streetAddressLine>

        <family>Everyman</family>
      </name>
      <administrativeGenderCode code="M"
          codeSystem="2.16.840.1.113883.5.1" displayName="Male"/>
      <birthTime value="19541125"/>
    </patient>
  </patientRole>
</recordTarget>
```

715   **Figure 6.3.2-2: recordTarget example**

9. **SHALL** contain at least one [1..*] **author** (CONF:5444-CRC). The **author** element represents the person who created the clinical document. If there are multiple procedures performed, there may be multiple authors for the content of this
720 document.

   a. Such authors **SHALL** contain exactly one [1..1] **time** (CONF:5445). This is the time the author started to contribute to this document.

b. Such authors sʜᴀʟʟ contain exactly one [1..1] **assignedAuthor** (CONF:5448).

725

i. This assignedAuthor sʜᴀʟʟ contain at least one [1..*] **id** (CONF:5449).

i. This assignedAuthor sʜᴀʟʟ contain at least one [1..*] **addr** (CONF:5452).

ii. This assignedAuthor sʜᴀʟʟ contain at least one [1..*] **telecom** (CONF:5428).

730

iii. This assignedAuthor sʜᴀʟʟ contain exactly one [1..1] **assignedPerson** (CONF:5430-CRC).

1. This assignedPerson sʜᴀʟʟ contain at least one [1..*] **name** (CONF:5431-CRC).

Figure 6.3.2-10: documentationOf/serviceEvent example

6.3.3 Cath Report Content Body Containment

The body for the Cardiac Report Content document shall include section content modules. The section content modules will be specified by a set of constraints.

1. SHALL contain exactly one [1..1] **component** (CONF:9588).
   a. A Cath Report Content SHALL have a structuredBody (CONF:9589-CRC).
      i. A Cath Report Content SHALL conform to CDA Level 3 (structuredBody containing sections that contain a narrative block and coded entries). In this template (templateId 1.3.6.1.4.1.19376.1.4.1.1.2), some coded entries are used. (CONF:9590-CRC).

39

b. The component/structuredBody **SHALL** conform to the section constraints below (CONF:9595-CRC).

    i. **EACH section SHALL HAVE A title AND THE title SHALL NOT BE EMPTY** (CONF:9937).

1120

Table 6.3.3-1 identifies the set of specific *section content modules* that may be required, recommended, or allowed to be included in the CRC document. This table also identifies the most important *entry content modules* contained within those section content modules. The containment relationship among the section and entry content modules in the body of a Cath Report Content document is represented in the "Template Title" column as noted by the indentation relative to the other content modules.

1125

1. Section content modules

    a. Any section content module that is used exactly as specified in C-CDA shall not have the C-CDA constraints replicated in this specification.

1130

    b. If the section content module is used in this profile but with different vocabulary constraints, then the vocabulary constraints shall be listed in the "Constraints" columns of the table and shall be included in this specification.

    c. Sample XML shall be included for each section content module and should include XML for each entry contained within the section.

1135

2. Entry content modules

    a. Any entry content module that is used exactly as specified in C-CDA shall not have the specific constraints replicated in this specification.

    b. If the entry content module is relevant to this CRC profile, it shall be included in Table 6.3.3-1 following the section content module it is contained within.

1140

    c. If the entry content module has CRC specific vocabulary constraints, the constraints shall be identified in the "Constraints" columns of the table and shall be documented in this specification.

    d. Sample XML should be included for the entries within the section content module where it is used.

1145

6.3.4 Cath Report Content Document Section/Entry Constraints

6.3.4.1 Document Summary Section 55112-7

```
[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.16 (open)]
```

The Document Summary section content module includes a summary of most significant aspects of the procedures in a narrative form. It is a condensed form of the full narrative report whose structure has no constraint.

> This Document Summary section content module is a new content module that has no equivalent in C-CDA. The complete set of constraints for the Document Summary section content module are listed below.

1. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it

   a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.2.16" (CONF:CRC-xxx).

2. **SHALL** contain exactly one [1..1] **code/@code**="55112-7" Document Summary (CodeSystem: LOINC 2.16.840.1.113883.6.1) (CONF:CRC-xxx).

3. **SHALL** contain exactly one [1..1] **title** (CONF:CRC-xxx).

4. **SHALL** contain exactly one [1..1] **text** (CONF:CRC-xxx).

   a. The text element **MAY** contain one or more **renderMultiMedia** element representing an in-line graphic. The related observationMedia entry may be within the summary section structured entries or may be referenced from another section.

5. **MAY** contain zero or more [0..*] **entry** (CONF:CRC-xxx) such that it

   a. **SHALL** contain exactly one [1..1] **ObservationMedia** element (CONF:CRC-xxx) such that it

      i. **SHALL** contain exactly one [1..1] **@classCode**="OBS" (CONF:CRC-xxx).

      ii. **SHALL** contain exactly one [1..1] **@moodCode**="EVN" Event (CodeSystem: ActMood 2.16.840.1.113883.5.1001) (CONF:CRC-xxx).

      iii. **SHALL** contain at least one [1..*] **id** (CONF:CRC-xxx).

      iv. **SHALL** contain at least one [1..*] **value** with @xsi:type="ED" (CONF:CRC-xxx)

         1. **SHALL** contain exactly one [1..1] **@mediaType** drawn from the value set 1.3.6.1.4.1.19376.1.4.1.5.45 SupportedFileFormats **STATIC** 20100512 (CONF:CRC-xxx).

         2. **MAY** contain zero or one [0..1] **reference** (CONF:CRC-xxx).

            a. The URL of a referenced graphic element **MAY** be present (CONF:CRC-xxx).

         3. An encapsulated data value may have both inline data and a reference. The reference must point to the same data as provided inline as per HL7 v3 Data Types – Abstract Specification, Release 1, Section 2.4.5 (CONF:CRC-xxx).

Figure 6.3.4.1-1: Document Summary – Cardiac section example

6.3.4.2 Medical History - Cardiac Section 11329-0

[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.17(open)]

([section: templateId 2.16.840.1.113883.10.20.22.2.39(open)] - parent)

The Medical History – Cardiac section content module describes all aspects of the medical history of the patient even if not pertinent to the current procedure, and may include chief complaint, past medical history, social history, family history, surgical or procedure history, medication history, and other history information. The history may be limited to information pertinent to the current procedure or may be more comprehensive. The history may be reported as a collection of random clinical statements or it may be reported categorically. Entries for

46

History of Past Illness and History of Present Illness have been consolidated into this section.
1245 Social and Family History are discussed in their own sections. For this Cath Report Content
profile, this Medical History – Cardiac section content module may also contain history about
specific relevant problems as problem observations.

In the event that the patient was transferred from another facility where there was a problem
indication that the patient was determined to need a cath procedure, this will be noted as a
1250 problem observation in this medical history section as text in the narrative for now until there is a
code representing this.

> This Medical History – Cardiac section content module extends the Medical (General History
> Section (C-CDA 4.31). The additional constraints are listed below.

1. **SHALL** contain exactly one [1..1] `templateId` (CONF:8160) such that it
1255   a. **SHALL** contain exactly one [1..1] `@root`="1.3.6.1.4.1.19376.1.4.1.2.17"
         (CONF:10403-CRC).
2. **MAY** contain zero or more [0..*] `entry` (CONF:CRC-xxx) such that it
    a. **SHALL** contain exactly one [1..1] **Problem Observation – Cardiac**
       (1.3.6.1.4.1.19376.1.4.1.4.9) (CONF:CRC-xxx).
1260 3. **MAY** contain zero or more [0..*] `entry` (CONF:CRC-xxx) such that it
    a. **SHALL** contain exactly one [1..1] **Procedure Activity
       Observation** (2.16.840.1.113883.10.20.22.4.13) (CONF:CRC-xxx).
4. **MAY** contain zero or more [0..*] `entry` (CONF:CRC-xxx) such that it
    a. **SHALL** contain exactly one [1..1] **Procedure Activity Procedure**
1265   (2.16.840.1.113883.10.20.22.4.14) (CONF:CRC-xxx).

6.3.4.2.1 Problem Observation – Cardiac Constraints

1425   [Observation: templateId 1.3.6.1.4.1.19376.1.4.1.9(open)]

This Problem Observation – Cardiac entry is used exactly as specified in the CRC Common Entry Content Modules - section 6.3.5.1, except for vocabulary constraints.

A Content Creator SHALL be able to include a Problem Observation – Cardiac Entry for each of the conditions identified in Value Set 1.3.6.1.4.1.19376.1.4.1.5.31 Cardiac
1430   Problems/Concerns.   The value set for CONF:9058 (**value**) SHOULD be selected from ValueSet Cardiac Problems/Concerns (1.3.6.1.4.1.19376.1.4.1.5.31) **STATIC**.

A Content Creator SHALL be able to indicate the absence of the condition for the patient using the negation indicator.

A Content Creator SHALL be able to include a Problem Observation – Cardiac Entry with code
1435   {160245001, SNOMED CT, "No current problems or disability"}.

6.3.4.2.2 Procedure Activity Observation - Constraints

         [observation: templateId 2.16.840.1.113883.10.20.22.4.13(open)]

This entry is used exactly as specified in C-CDA - section 5.48, except for vocabulary constraints for targetSiteCode.

1440   This entry is used to document the prior procedures for this patient that may be relevant to this cath procedure.

The value set for CONF:10121 (**targetSiteCode**) SHOULD be selected from ValueSet Body Site Value Set 1.3.6.1.4.1.19376.1.4.1.5.32 **STATIC**.

6.3.4.2.3 Procedure Activity Procedure - Constraints

1445   [procedure: templateId 2.16.840.1.113883.10.20.22.4.14(open)]

This entry is used exactly as specified in C-CDA - section 5.49, except for vocabulary constraints for code and targetSiteCode.

This entry is used to document the prior procedures for this patient that may be relevant to this cath procedure. Prior procedures can include but are not limited to Cath, PCI and CABG.

1450   The value set for CONF:7657 (**code**) SHOULD be selected from ValueSet Cardiac Activity Procedures (1.3.6.1.4.1.19376.1.4.1.5.40) **STATIC**.

The value set for CONF:7683 (**targetSiteCode**) SHOULD be selected from ValueSet Body Site (1.3.6.1.4.1.19376.1.4.1.5.32) **STATIC**.

1455 6.3.4.3 Allergies Section 48765-2

[section: templateId 2.16.840.1.113883.10.20.22.2.6(open)]

This Allergies section content module lists and describes any medication allergies, adverse reactions, idiosyncratic reactions, anaphylaxis/anaphylactoid reactions to food items, and metabolic variations or adverse reactions/allergies to other substances (such as latex, iodine, tape

1460 adhesives) used to assure the safety of health care delivery. At a minimum, it should list currently active and any relevant historical allergies and adverse reactions.

This Allergies section content module is used exactly as specified in C-CDA - section 4.2.

Within this Allergies section content module the Content Creator SHALL be able to create an Allergy Observation entry for each of the cardiac imaging agent classes identified in Value Set

1465 Contrast Agents Classes for Adverse Reactions (1.3.6.1.4.1.19376.1.4.1.5.34).

```

1485 6.3.4.3.1 Allergy Observation - Constraints

[observation: templateId 2.16.840.1.113883.10.20.22.4.7(open)]

This Allergy Observation entry content module is used exactly as specified in C-CDA - section 5.4, except for vocabulary constraints on CONF:10083.

If the allergy is to Contrast Agents, the value set for CONF:10083 (code) SHALL be selected from

1490 ValueSet Contrast Agents Classes for Adverse Reactions (1.3.6.1.4.1.19376.1.4.1.5.34) STATIC.

6.3.4.4 Family History – Cardiac Section 10157-6

[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.18(open)]

The Family History - Cardiac section content module contains data defining the patient's genetic relatives in terms of possible or relevant health risk factors that have a potential impact on the 1495 patient's healthcare risk profile.

> This Family History – Cardiac section content module modifies the constraints defined for the C-CDA Family History Section (C-CDA 4.55). The complete set of constraints for this Family History – Cardiac section content module are listed below.

1. **SHALL** contain exactly one [1..1] **templateId** (CONF:7932) such that it
   a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.2.18" (CONF:10388-CRC).
2. **SHALL** contain exactly one [1..1] **code/@code**="10157-6" Family History (CodeSystem: LOINC 2.16.840.1.113883.6.1) (CONF:7933).
3. **SHALL** contain exactly one [1..1] **title** (CONF:7934).
4. **SHALL** contain exactly one [1..1] **text** (CONF:7935).
5. **SHALL** contain at least one [1..*] **Problem Observation**. (CONF:CRC-XXX)

6.3.4.4.1 Problem Observation - Constraints

```
[Observation: templateId 2.16.840.1.113883.10.20.22.4.4(open)]
```

1535   The Problem Observation entry content module is used exactly as specified in C-CDA - section 5.45, except for vocabulary constraints on CONF:9058.

The value set for CONF:9058 (**code**) ꜱʜᴏᴜʟᴅ be selected from ValueSet Cardiovascular Family History (1.3.6.1.4.1.19376.1.4.1.5.33) ꜱᴛᴀᴛɪᴄ.

6.3.4.5 Social History Section 29762-2

1540

```
[section: templateId 2.16.840.1.113883.10.20.22.2.17(open)]
```

The Social History section content module is used exactly as specified in C-CDA - section 4.57.

This Social History section content module contains data defining the patient's occupational, personal (e.g., lifestyle), social, and environmental history and health risk factors, as well as administrative data such as marital status, race, ethnicity and religious affiliation. Social history
1545   can have significant influence on a patient's physical, psychological and emotional health and wellbeing so should be considered in the development of a complete record.

6.3.4.5.1 Social History Observation - Constraints

```
[observation: templateId 2.16.840.1.113883.10.20.22.4.38(open)]
```

The Social History Observation entry content module is used exactly as specified in C-CDA - section 5.61.

To include smoking status observations, the values allowed for CONF:8559 (`value`) SHOULD be selected from ValueSet Smoking History 1.2.840.10008.6.1.225 STATIC.

To include cocaine misuse behavior, the value allowed for CONF:8559 (`value`) SHOULD be "78267003" from SNOMED CT "Cocaine abuse".

6.3.4.6 Physical Exam Section 29545-1

```
[section: templateId 2.16.840.1.113883.10.20.2.10(open)]
```

The Physical Exam section content module is used exactly as specified in C-CDA - section 5.5.

The Physical Exam section content module includes direct observations made by the clinician. The examination may include the use of simple instruments and may also describe simple maneuvers performed directly on the patient's body. This Physical Exam section includes only observations made by the examining clinician using inspection, palpation, auscultation, and percussion; it does not include laboratory or imaging findings. The exam may be limited to pertinent body systems based on the patient's chief complaint or it may include a comprehensive examination. The examination may be reported as a collection of random clinical statements or it may be reported categorically.

Figure 6.3.4.7-1: Vital Signs section example

6.3.4.7.1 Vital Sign Observation - Constraints

1650   [observation: templateId 2.16.840.1.113883.10.20.22.4.27(open)]

The Vital Sign Observation entry content module is used exactly as specified in C-CDA - section 5.65, except for vocabulary constraints.

The value set for CONF:7301 (**code**) SHOULD be selected from ValueSet Vital Sign Result Type 1.3.6.1.4.1.19376.1.4.1.5.36 STATIC.

6.3.4.8 Pre-Procedure Results – Cardiac Section 30954-2

[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.23 (open)]

([section: templateId 2.16.840.1.113883.10.20.22.2.3(open)] – parent)

This Pre-Procedure Results – Cardiac Section content module is based on the C-CDA Results Section content module as specified in C-CDA - section 4.55.

The Pre-Procedure Results – Cardiac section content module contains the results of pre-procedure tests that are required to prepare for the cath procedure. Results from prior diagnostic cath procedures are included here if they provide indications for the current interventional procedure. There may also be a reference to an optional external document in the result organizer.

This Pre-Procedure Results – Cardiac section content module contains the results of observations generated by laboratories, imaging procedures, and other procedures. The scope includes observations such as hematology, chemistry, serology, virology, toxicology, microbiology, plain x-ray, ultrasound, CT, MRI, angiography, echocardiography, nuclear medicine, pathology, and procedure observations. The section often includes notable results such as abnormal values or relevant trends, and could contain all results for the period of time being documented.

Imaging results are typically generated by a clinician reviewing the output of an imaging procedure, such as where a cardiologist reports the left ventricular ejection fraction based on the review of a cardiac echocardiogram.

> This Pre-Procedure Results – Cardiac section content module modifies the Results Section (C-CDA 4.55). The complete set of constraints for the Pre-Procedure Results – Cardiac section content module are defined below. The substitutions are highlighted in yellow. This Pre-Procedure Results – Cardiac section content module is also conformant to the C-CDA Results Section content module.

Figure 6.3.4.8-1: Pre-Procedure Results section example

6.3.4.8.1 Result Organizer - Cardiac

[organizer: templateId 1.3.6.1.4.1.19376.1.4.1.4.11 (open)]

([organizer: templateId 2.16.840.1.113883.10.20.22.4.1(open)] – parent)

1750 This clinical statement identifies a set of result observations. It contains information applicable to all of the contained result observations. Result type codes categorize a result into one of several commonly accepted values (e.g., "Diagnostic Cath", "PCI", "Diagnostic Cath and PCI"). These values are often implicit in the Result Organizer code (e.g., an Organizer/code of "complete blood count" implies a Result Observation
1755 code of "Hematology").

An appropriate nullFlavor can be used when a single result observation is contained in the organizer, and organizer/code or organizer/id is unknown.

There may also be a reference to an optional external document in the result organizer.

1760 This Result Organizer – Cardiac entry content module extends the C-CDA Result Organizer entry definition (C-CDA 5.57) by adding the constraints listed below.

1. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it
   a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.4.11" (CONF:CRC-xxx).
2. **MAY** contain zero or more [0..*] **reference** (CONF:CRC-xxx) such that it
1765   a. **SHALL** contain exactly one [1..1] **@typeCode**="REFR" Refers to (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:CRC-xxx).
   b. **SHALL** contain exactly one [1..1] **externalDocument** (CONF:CRC-xxx).
      i. This externalDocument **SHALL** contain at least one [1..*] **id**
1770   (CONF:CRC-xxx).
      ii. This externalDocument **MAY** contain zero or one [0..1] **text** (CONF:CRC-xxx).
         1. The text, if present, **MAY** contain zero or one [0..1] **@mediaType** (CONF:CRC-xxx).
1775   2. The text, if present, **MAY** contain zero or one [0..1] **reference** (CONF:CRC-xxx).
            a. The URL of a referenced pre-procedure results document **MAY** be present, and **SHALL** be represented in organizer/reference/ExternalDocument/text/reference
1780   (CONF:CRC-xxx).
            b. If a URL is referenced, then it **SHOULD** have a corresponding linkHTML element in narrative block (CONF:CRC-xxx).

1785

6.3.4.8.2 Result Observation - Constraints

```
[observation: templateId 2.16.840.1.113883.10.20.22.4.2(open)]
```

1790 This clinical statement represents details of a lab, radiology, or other study performed on a patient.

This Result Observation entry is used exactly as specified in C-CDA - section 5.56 except for vocabulary constraints for the code and value elements.

The value set for CONF:7166 (`code`) **SHOULD** be selected from LOINC (CodeSystem: 2.16.840.1.113883.6.1) or SNOMED CT using the Value Set Result Observation
1795 (1.3.6.1.4.1.19376.1.4.1.5.38) **STATIC**.

The value set for CONF:9109 (`code`) **SHOULD** be selected from ValueSet Cardiac Lab Results (1.3.6.1.4.1.19376.1.4.1.5.35) **STATIC**.

The value set for CONF:7153 (`value`) **SHOULD** be selected from ValueSet Body Site (1.3.6.1.4.1.19376.1.4.1.5.32) **STATIC**.

1800 ### 6.3.4.9 Planned Procedure Section 59772-4

```
[section: templateId 2.16.840.1.113883.10.20.22.2.30(open)]
```

The Planned Procedure section is used exactly as specified in C-CDA - section 4.40.

The Planned Procedure section records the procedure(s) that a physician or clinician thought would need to be done based on the preoperative assessment. Procedures include but are not
1805 limited to Diagnostic Cath, Angiography, and PCI. It may be important to record the procedure(s) that were originally planned for, consented to, and perhaps pre-approved by the payor, particularly if different from the actual procedure(s) and procedure details, to provide evidence to various stakeholders that the providers are aware of the discrepancy and the justification can be found in the procedure details.

1835 **6.3.4.10 Procedure Indications Section 59768-2**

[section: templateId 2.16.840.1.113883.10.20.22.2.29(open)]

The Procedure Indications section content module is used exactly as specified in C-CDA - section 4.50.

The Procedure Indications section content module records details about the reason for this
1840 Cath/PCI procedure. This Procedure Indications section content module may include the pre-procedure diagnosis or diagnoses as well as one or more symptoms that contribute to the reason the procedure is being performed.

1865 **Figure 6.3.4.10-1: Procedure Indications section example**

6.3.4.10.1 Indication - Constraints

`[observation: templateId 2.16.840.1.113883.10.20.22.4.19(open)]`

This Indication entry content module is used exactly as specified in C-CDA - section 5.25 except for vocabulary constraints.

1870 The Indication entry content module documents the rationale for an activity. It can do this with the id element to reference a problem recorded elsewhere in the document or with a code and value to record the problem type and problem within the Indication. For example, the indication for Diagnostic Catheterization might be chest pain.

The value set for CONF:7657 (**value**) **SHOULD** be selected from ValueSet Procedure
1875 Indications (1.3.6.1.4.1.19376.1.4.1.5.37) **STATIC**.

6.3.4.11 Anesthesia Section 59774-0

`[section: templateId 2.16.840.1.113883.10.20.22.2.25(open)]`

The Anesthesia section content module is used exactly as specified in C-CDA - section 4.3.

The Anesthesia section content module briefly describes the general anesthesia used and may
1880 state the actual agent used. The Procedure Activity Procedure entry content module describes the anesthesia procedure. The Medication Activity entry content module may describe the general anesthesia medication used during this cath procedure.

6.3.4.11.1 Procedure Activity Procedure - Constraints

`[procedure: templateId 2.16.840.1.113883.10.20.22.4.14(open)]`

The Procedure Activity Procedure entry content module is used exactly as specified in C-CDA - section 5.49, except for vocabulary constraints.

1940 The Procedure Activity Procedure entry content module describes the anesthesia procedure.

The value set for CONF:7657 (`code`) SHOULD be selected from ValueSet Cardiac Activity Procedures (1.3.6.1.4.1.19376.1.4.1.5.40) STATIC.

The value set for CONF:7683 (`targetSiteCode`) SHOULD be selected from ValueSet Body Site Value Set 1.3.6.1.4.1.19376.1.4.1.5.32 STATIC.

1945 ### 6.3.4.12 Medications Administered Section 29549-3

`[section: templateId 2.16.840.1.113883.10.20.22.2.38(open)]`

This Medications Administered section content module is used exactly as specified in C-CDA - section 4.32 except for vocabulary constraints.

The Medications Administered section content module defines medications and fluids
1950 administered during the procedure, encounter, or other activity excluding general anesthetic medications.

A Content Creator SHALL be able to create a Medications Activity entry with a Medication Information Entry for each of the cardiac medication classes identified in Value Set `1.3.6.1.4.1.19376.1.4.1.5.41` Drug Classes and Specific Cardiac Drugs Used in
1955 Cardiac Procedures.

A Content Creator SHALL be able to create a Medications Activity entry with a Medication Information entry for the relevant cardiac contrast agents identified in Value Set `1.3.6.1.4.1.19376.1.4.1.5.39` Contrast Agents.

The set of contrast agents implemented may be limited to a subset of the Value Set, based on the
1960 types of procedures for which the Content Creator creates reports, hence the term "*relevant cardiac contrast agents*".

6.3.4.12.1 Medication Information - Constraints

[manufacturedProduct: templateId 2.16.840.1.113883.10.20.22.4.23(open)]

2010 This Medication Information entry is used exactly as specified in C-CDA - section 5.29 except for vocabulary constraints.

The value set for CONF:7412 (`manufacturedMaterial/code@code`) **SHOULD** be selected from ValueSet Medication Clinical Drug (1.3.6.1.4.1.19376.1.4.1.5.41) **STATIC** or **SHOULD** be selected from ValueSet Contrast Agents (1.3.6.1.4.1.19376.1.4.1.5.39) **STATIC**.

6.3.4.13 Procedure Description – Cardiac Section 29554-3

[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.19(open)]

([section: templateId 2.16.840.1.113883.10.20.22.2.27(open)] – parent)

The Procedure Description – Cardiac section content module records the details of the cardiac procedures and may include procedure site preparation, surgical site preparation, pertinent details related to sedation/anesthesia, pertinent details related to measurements and markings, procedure times, medications administered, estimated blood loss, specimens removed, instrumentation, sponge counts, tissue manipulation, wound closure, sutures used, vital signs and other monitoring data. Local practice often identifies the level and type of detail required based on the procedure or specialty.

This Procedure Description – Cardiac section content module may include a device organizer to record information about each device used during the procedures. All devices should be defined at this section level within a Procedure Device Organizer – Cardiac entry. Additional characteristics inherent to these devices, like length and diameter, should be defined using an additional Procedure Device Organizer – Cardiac entry within this section. In addition, dynamic attributes of these devices, like balloon inflation atmospheres, should be recorded in the Procedure Activity Procedure – Cardiac entry within this section content module.

For PCI procedures, individual lesions will be defined in this section as separate lesion observations identified by a unique "lesion ID". Only the location of the lesion will be identified here. Procedures, procedure findings, and results can then reference to the lesion to which it is related by creating an entryRelationship of type="REFR" to the lesion observation based on the "lesion ID" within the Procedure Activity Procedure – Cardiac entry.

> This Procedure Description – Cardiac section content module extends the C-CDA Procedure Description section (C-CDA 4.45) by adding the constraints listed below.

1. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it
    a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.2.19" (CONF:CRC-xxx).

2270   **Figure 6.3.4.13-1: Procedure Description - Cardiac section example**

6.3.4.13.1 Procedure Activity Procedure - Cardiac

[procedure: templateId 1.3.6.1.4.1.19376.1.4.1.4.14 (open)]

([procedure: templateId 2.16.840.1.113883.10.20.22.4.14(open)] – parent)

2275 This clinical statement represents procedures whose immediate and primary outcome (post-condition) is the alteration of the physical condition of the patient. Examples of these procedures are a diagnostic cardiac catheterization and PCI.

This Procedure Activity Procedure – Cardiac entry content module may also include a device organizer to record specific properties of the devices as observed during the procedure. Dynamic attributes of these devices, like balloon inflation atmospheres, should be recorded in this
2280 Procedure Activity Procedure – Cardiac entry.

Within this Procedure Activity Procedure – Cardiac entry content module, Product Instances are used to document the devices used. Record as many devices as needed unless the cath lab procedure is aborted. In this case, there may be no devices used.

Developers using this CRC content profile will map specific equipment using appropriate
2285 inventory numbering and product descriptions provided by the hemodynamic monitoring system or equivalents. If this CRC content profile is to be consumed and used in a CVIS, it is up to the developer to map the actual codes to the appropriate ACC NCDR-Cath/PCI codes.

This Procedure Activity Procedure – Cardiac entry content module is used exactly as specified in C-CDA - section 5.49 except for the modifications to the constraints highlighted in yellow
2290 below. This Procedure Activity Procedure – Cardiac entry content module is also conformant to the C-CDA Procedure Activity Procedure entry content module.

1. **SHALL** contain exactly one [1..1] **@classCode**="PROC" Procedure (CodeSystem: HL7ActClass 2.16.840.1.113883.5.6) (CONF:7652).
2295 2. **SHALL** contain exactly one [1..1] **@moodCode**, which **SHALL** be selected from ValueSet MoodCodeEvnInt 2.16.840.1.113883.11.20.9.18 **STATIC** 2011-04-03 (CONF:7653).
3. **SHALL** contain two or more [2..*] **templateId** (CONF:7654-CRC) such that
      a. **SHALL** contain exactly one [1..1]
2300   **@root**="2.16.840.1.113883.10.20.22.4.14" (CONF:10521).
      b. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.4.14" (CONF:CRC-xxx).
4. **SHALL** contain at least one [1..*] **id** (CONF:7655).
5. **SHALL** contain exactly one [1..1] **code** (CONF:7656).
2305   a. This code in a procedure activity **SHOULD** be selected from LOINC (codeSystem 2.16.840.1.113883.6.1) or SNOMED CT (CodeSystem:

72

2310

2.16.840.1.113883.6.96), and **MAY** be selected from CPT-4 (CodeSystem: 2.16.840.1.113883.6.12), ICD9 Procedures (CodeSystem: 2.16.840.1.113883.6.104), ICD10 Procedure Coding System (CodeSystem: 2.16.840.1.113883.6.4). The recommended Value Set can be found in Cardiac Activity Procedures (1.3.6.1.4.1.19376.1.4.1.5.40). (CONF:7657-CRC)

    b. This code **SHOULD** contain zero or one [0..1] `originalText` (CONF:7658).

2315

        i. The originalText, if present, **SHOULD** contain zero or one [0..1] `reference/@value` (CONF:7659).

            1. This reference/@value **SHALL** begin with a '#' and **SHALL** point to its corresponding narrative (using the approach defined in CDA Release 2, section 4.3.5.1) (CONF:7660).

6. **SHALL** contain exactly one [1..1] `statusCode`, where the @code **SHALL** be selected from ValueSet `ProcedureAct statusCode 2.16.840.1.113883.11.20.9.22` **DYNAMIC** (CONF:7661).

2320

7. **SHOULD** contain zero or one [0..1] `effectiveTime` (CONF:7662).

8. **MAY** contain zero or one [0..1] `priorityCode`, where the @code **SHALL** be selected from ValueSet `ActPriority 2.16.840.1.113883.1.11.16866` **DYNAMIC** (CONF:7668).

2325

9. **MAY** contain zero or one [0..1] `methodCode` (CONF:7670).

    a. methodCode **SHALL NOT** conflict with the method inherent in Procedure / code (CONF:7890).

10. **SHALL** contain at least one [1..*] `targetSiteCode` (CONF:7683-CRC).

2330

    a. The targetSiteCode, if present, **SHALL** contain exactly one [1..1] `code`, where the @code **SHALL** be selected from ValueSet `Body Site 1.3.6.1.4.1.19376.1.4.1.5.32` **STATIC** (CONF:10122-CRC).

    b. This code **SHOULD** contain zero or one [0..1] `originalText` (CONF:CRC-xxx).

2335

        i. The originalText, if present, **SHOULD** contain zero or one [0..1] `reference/@value` (CONF:CRC-xxx).

            1. This reference/@value **SHALL** begin with a '#' and **SHALL** point to its corresponding narrative (using the approach defined in CDA Release 2, section 4.3.5.1) (CONF:CRC-xxx).

2340

            2. This text is used to describe the native or graft structures in the patient's coronary anatomy.

11. **MAY** contain zero or more [0..*] `specimen` (CONF:7697).

    a. This specimen is for representing specimens obtained from a procedure (CONF:8008).

2345

    b. The specimen, if present, **SHALL** contain exactly one [1..1] `specimenRole` (CONF:7704).

        i. This specimenRole **SHOULD** contain zero or more [0..*] `id` (CONF:7716).

2350

1. If you want to indicate that the Procedure and the Results are referring to the same specimen, the Procedure/specimen/specimenRole/id **SHOULD** be set to equal an Organizer/specimen/ specimenRole/id (CONF:7717).

12. **SHOULD** contain zero or more [0..*] **performer** (CONF:7718) such that it

    a. **SHALL** contain exactly one [1..1] **assignedEntity** (CONF:7720).

2355

        i. This assignedEntity **SHALL** contain at least one [1..*] **id** (CONF:7722).

        ii. This assignedEntity **SHALL** contain exactly one [1..1] **addr** (CONF:7731).

        iii. This assignedEntity **SHALL** contain exactly one [1..1] **telecom** (CONF:7732).

2360

        iv. This assignedEntity **SHOULD** contain zero or one [0..1] **representedOrganization** (CONF:7733).

            1. The representedOrganization, if present, **SHOULD** contain zero or more [0..*] **id** (CONF:7734).

            2. The representedOrganization, if present, **MAY** contain zero or more [0..*] **name** (CONF:7735).

2365

            3. The representedOrganization, if present, **SHALL** contain exactly one [1..1] **addr** (CONF:7736).

            4. The representedOrganization, if present, **SHALL** contain exactly one [1..1] **telecom** (CONF:7737).

2370

13. **MAY** contain zero or more [0..*] **participant** (CONF:7751) such that it

    a. **SHALL** contain exactly one [1..1] **@typeCode**="DEV" Device (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:7752).

    b. **SHALL** contain exactly one [1..1] **Product Instance** (2.16.840.1.113883.10.20.22.4.37) (CONF:7754).

2375

14. **MAY** contain zero or more [0..*] **participant** (CONF:7765) such that it

    a. **SHALL** contain exactly one [1..1] **@typeCode**="LOC" Location (CodeSystem: HL7ParticipationType 2.16.840.1.113883.5.90) (CONF:7766).

    b. **SHALL** contain exactly one [1..1] **Service Delivery Location** (2.16.840.1.113883.10.20.22.4.32) (CONF:7767).

2380

15. **MAY** contain zero or more [0..*] **entryRelationship** (CONF:7768) such that it

    a. **SHALL** contain exactly one [1..1] **@typeCode**="COMP" Has Component (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:7769).

    b. **SHALL** contain exactly one [1..1] **@inversionInd**="true" true (CONF:8009).

2385

    c. **SHALL** contain exactly one [1..1] **encounter** (CONF:7770).

        i. This encounter **SHALL** contain exactly one [1..1] **@classCode**="ENC" Encounter (CodeSystem: HL7ActClass 2.16.840.1.113883.5.6) (CONF:7771).

        ii. This encounter **SHALL** contain exactly one [1..1] **@moodCode**="EVN"

2390

        Event (CodeSystem: ActMood 2.16.840.1.113883.5.1001) (CONF:7772).

iii. This encounter **SHALL** contain exactly one [1..1] `id` (CONF:7773).

    1. Set the encounter ID to the ID of an encounter in another section to signify they are the same encounter (CONF:7774).

16. **MAY** contain zero or one [0..1] `entryRelationship` (CONF:7775) such that it

    a. **SHALL** contain exactly one [1..1] `@typeCode`="SUBJ" Has Subject (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:7776).

    b. **SHALL** contain exactly one [1..1] `@inversionInd`="true" true (CONF:7777).

    c. **SHALL** contain exactly one [1..1] **Instructions** (2.16.840.1.113883.10.20.22.4.20) (CONF:7778).

17. **MAY** contain zero or more [0..*] `entryRelationship` (CONF:7779) such that it

    a. **SHALL** contain exactly one [1..1] `@typeCode`="RSON" Has Reason (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:7780).

    b. **SHALL** contain exactly one [1..1] **Indication** (2.16.840.1.113883.10.20.22.4.19) (CONF:7781).

18. **MAY** contain zero or one [0..1] `entryRelationship` (CONF:7886) such that it

    a. **SHALL** contain exactly one [1..1] `@typeCode`="COMP" Has Component (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:7887).

    b. **SHALL** contain exactly one [1..1] **Medication Activity** (2.16.840.1.113883.10.20.22.4.16) (CONF:7888).

19. **MAY** contain zero or more [0..*] `entry` (CONF:CRC-xxx) such that it

    a. **SHALL** contain exactly one [1..1] **Procedure Device Organizer - Cardiac** (1.3.6.1.4.1.19376.1.4.1.4.12) (CONF:CRC-xxx).

20. **MAY** contain zero or one [0..1] `entryRelationship` (CONF:CRC-xxx) such that it

    a. **SHALL** contain exactly one [1..1] `@typeCode`="REFR" References (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:CRC-xxx).

    b. **SHALL** contain exactly one [1..1] **Lesion Observation** (1.3.6.1.4.1.19376.1.4.1.10) (CONF:CRC-xxx). This refers to the lesion that this procedure is related to.

6.3.4.13.2 Procedure Device Organizer - Cardiac

[organizer: templateId 1.3.6.1.4.1.19376.1.4.1.4.12 (open)]

This Procedure Device Organizer – Cardiac entry content module identifies a set of observations related to a device used during procedures. It is intended to be used to further describe the devices used during these procedures.

1. **SHALL** contain exactly one [1..1] `@classCode` (CONF:CRC-xxx).

    a. **SHALL** contain exactly one [1..1] @classCode="CLUSTER" Cluster (CodeSystem: 2.16.840.1.113883.5.6 HL7ActClass) (CodeSystem: 2.16.840.1.113883.5.6 HL7ActClass) (CONF:CRC-xxx).

2435

      2. **SHALL** contain exactly one [1..1] **@moodCode**="EVN" Event (CodeSystem: ActMood 2.16.840.1.113883.5.1001) (CONF:CRC-xxx).

      3. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it

        a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.4.12" (CONF:CRC-xxx).

      4. **SHALL** contain at least one [1..*] **id** (CONF:CRC-xxx).

      5. **SHOULD** contain zero or one [0..1] **participant** (CONF:CRC-xxx) such that it

2440

        a. **SHALL** contain exactly one [1..1] **@typeCode**="SUBJ" (CodeSystem: HL7ParticipationType 2.16.840.1.113883.5.90) (CONF:CRC-xxx).

        b. **SHALL** contain exactly one [1..1] **participantRole** (CONF:CRC-xxx).

          i. This participantRole **SHALL** contain exactly one [1..1] **@classCode**="MANU" Manufactured Product (CodeSystem: RoleClass 2.16.840.1.113883.5.110) (CONF:CRC-xxx).

2445

          ii. This participantRole **SHALL** contain exactly one [1..1] **playingDevice** (CONF:CRC-xxx).

            1. This playingDevice **SHALL** contain exactly one [1..1] **@classCode**="MMAT" Manufactured Material (CodeSystem: EntityClass 2.16.840.1.113883.5.41) (CONF:CRC-xxx).

2450

            2. This playingDevice **SHALL** contain exactly one [1..1] **code** (CONF:CRC-xxx).

            3. This playingDevice **SHALL** contain at least one [1..*] **id** (CONF:CRC-xxx).

2455

      6. **MAY** contain zero or more [0..*] **component** (CONF:CRC-xxx) such that it

        a. **SHALL** contain exactly one [1..1] **Device Observation** (1.3.6.1.4.1.19376.1.4.1.4.13) (CONF:CRC-xxx).

6.3.4.13.3 Device Observation

2460

[observation: templateId 1.3.6.1.4.1.19376.1.4.1.4.13(open)]

This Device Observation entry represents observations made of devices used during a procedure, such as a cardiac procedure. An example of a device observation would be balloon inflation time.

      1. **SHALL** contain exactly one [1..1] **@classCode**="OBS" Observation (CodeSystem: HL7ActClass 2.16.840.1.113883.5.6) (CONF:CRC-xxx).

2465

      2. **SHALL** contain exactly one [1..1] **@moodCode**="EVN" Event (CodeSystem: ActMood 2.16.840.1.113883.5.1001) (CONF:CRC-xxx).

      3. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it

        a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.4.13" (CONF:CRC-xxx).

2470

      4. **SHALL** contain at least one [1..*] **id** (CONF:CRC-xxx).

      5. **SHALL** contain exactly one [1..1] **code** (CONF:CRC-xxx).

a. **SHOULD** be from LOINC (CodeSystem: 2.16.840.1.113883.6.1) or SNOMED CT (CodeSystem: 2.16.840.1.113883.6.96) (CONF:CRC-xxx).

2475

6. **SHOULD** contain zero or one [0..1] **text** (CONF:CRC-xxx).

   a. The text, if present, **SHOULD** contain zero or one [0..1] **reference/@value** (CONF:CRC-xxx).

      i. This reference/@value **SHALL** begin with a '#' and **SHALL** point to its corresponding narrative (using the approach defined in CDA Release 2, section 4.3.5.1) (CONF:CRC-xxx).

2480

7. **SHALL** contain exactly one [1..1] **statusCode**="completed" Completed (CodeSystem: ActStatus 2.16.840.1.113883.5.14) (CONF:CRC-xxx).

8. **SHALL** contain exactly one [1..1] **effectiveTime** (CONF:CRC-xxx).

   a. represents clinically effective time of the measurement, which may be when the measurement was performed (e.g., a BP measurement), or may be when sample was taken (and measured some time afterwards) (CONF:CRC-xxx).

2485

9. **SHALL** contain exactly one [1..1] **value** with @xsi:type="ANY" (CONF:CRC-xxx).

6.3.4.14 Procedure Specimens Taken Section 59773-2

2490

[section: templateId 2.16.840.1.113883.10.20.22.2.31(open)]

This Procedure Specimens Taken section is used exactly as specified in C-CDA - section 4.51.

The Procedure Specimens Taken section records the tissues, objects, or samples taken from the patient during the procedure including biopsies, aspiration fluid, or other samples sent for pathological analysis. The narrative may include a description of the specimens.

6.3.4.16 Procedure Results - Cardiac Section 30954-2

[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.20 (open)]

([section: templateId 2.16.840.1.113883.10.20.22.2.3.1(open)] – parent)

This Procedure Results – Cardiac section content module records clinically significant results
2525 confirmed or discovered during the procedure. Results include findings, measurements,
calculations, and observations.

For this CRC profile, this Procedure Results – Cardiac section content module should be
organized using Procedure Results Organizer – Cardiac entry content modules for specific
categories (e.g., right heart cath findings, coronary anatomy findings, left heart cath findings, and
2530 PCI findings). There shall be a Procedure Result Organizer – Cardiac entry content module for
one or more of these categories of findings. The allowed categories are defined in
1.3.6.1.4.1.19376.1.4.1.5.43 CRC Procedure Findings Types which can be
expanded to include other procedures.

Result Observation – Cardiac entries are used to record specific findings (e.g., stenosis, timi
2535 flow, lesion characteristics, or wall motion characteristics) in each category. The specific
findings should be selected from the result observations Value Set
1.3.6.1.4.1.19376.1.4.1.5.38, Procedure Findings Constraints / Value Set. Note that
these findings may apply to lesions and coronary anatomy.

This Procedure Results – Cardiac section content module is a modification of the C-CDA Results
2540 Section with Coded Entries Required (C-CDA 4.55). The modifications are highlighted in yellow
below. This Procedure Results – Cardiac section content module is also conformant to the C-
CDA Results Section content module.

1. **SHALL** contain three or more [3..*] **templateId** (CONF:7108-CRC) such that it

6.3.4.16.1 Procedure Results Organizer - Cardiac

[organizer: templateId 1.3.6.1.4.1.19376.1.5.3.1.4.15 (open)]

([observation: templateId 2.16.840.1.113883.10.20.22.4.1(open)] – parent)

2650 This Procedure Results Organizer – Cardiac entry content module identifies a set of related procedure results, findings and observations. It contains information applicable to all of the contained procedure findings, including the lesion for PCI procedures. Related

procedure findings type codes categorize a finding into one of several commonly accepted values (e.g., "Right heart cath", "Left heart cath", "PCI").

2655

> This Procedure Results Organizer – Cardiac entry content module is a modification of the C-CDA Result Organizer Section (C-CDA 5.57). The modifications are highlighted in yellow below. This Procedure Results Organizer – Cardiac entry content module is also conformant to the C-CDA Results Organizer entry content module.

1. **SHALL** contain exactly one [1..1] **@classCode** (CONF:7121).

```
[observation: templateId 1.3.6.1.4.1.19376.1.4.1.4.16 (open)]

([observation: templateId 2.16.840.1.113883.10.20.22.4.2(open)] – parent)
```

A result observation is a clinical statement that a clinician has noted during the Cath Lab procedure. This Result Observation – Cardiac entry content module is used to describe the specific procedure findings that were observed during the specific Cath Lab procedure.

2695 The specific result observations are defined in 1.3.6.1.4.1.19376.1.4.1.5.38 Procedure Findings Constraints.

The targetSiteCode may be used for diagnostic cath procedures.

This Result Observation – Cardiac entry content module is a modification of the C-CDA Result Observation (C-CDA 5.56). The modifications are highlighted in yellow below. This Result
2700 Observation – Cardiac entry content module is also conformant to the C-CDA Result Observation entry content module.

    a. The targetSiteCode, if present, **SHALL** contain exactly one [1..1] **code** where the @code **SHALL** be selected from ValueSet `Body Site`

2735   `1.3.6.1.4.1.19376.1.4.1.5.32` **STATIC** (CONF:CRC-xxx).

13. **MAY** contain zero or one [0..1] **author** (CONF:7149).

14. **SHOULD** contain zero or more [0..*] **referenceRange** (CONF:7150).

    a. The referenceRange, if present, **SHALL** contain exactly one [1..1] **observationRange** (CONF:7151).

2740   i. This observationRange **SHALL NOT** contain [0..0] **code** (CONF:7152).

15. **SHOULD** contain zero or one [0..1] **entryRelationship** (CONF:CRC-xxx) such that it

    a. **SHALL** contain exactly one [1..1] **@typeCode**="SUBJ" Has subject (CodeSystem: `HL7ActRelationshipType 2.16.840.1.113883.5.1002`) (CONF:CRC-xxx).

2745   b. **SHALL** contain exactly one [1..1] **@inversionInd**="true" TRUE (CONF:CRC-xxx).

    c. **SHALL** contain exactly one [1..1] **Severity Observation** (2.16.840.1.113883.10.20.22.4.8) (CONF:CRC-xxx).

2750 ### 6.3.4.17 Complications Section 55109-3

[section: templateId 2.16.840.1.113883.10.20.22.2.37(open)]

This Complications section content module records problems that occurred during the cath lab procedure. The complications may have been known risks or unanticipated problems.

This Complications section content module is used exactly as specified in C-CDA - section 4.8,
2755 except for vocabulary constraints for Problem Observation entries.

There is a CRC specific value set defined for complications recorded as Problem Observation entries in this Complications section content module.

6.3.4.17.1 Problem Observation – Constraints

```
[observation: templateId 2.16.840.1.113883.10.20.22.4.4 (open)]
```

A problem is a clinical statement that a clinician has noted during the Cath procedure. This entry is used to describe the presence or absence of specific "complications" as defined by ACC.

2810   This Problem Observation entry content module is used exactly as specified in C-CDA - section 5.45, except for vocabulary constraints.

The value set for CONF:9058 (`value@code`) SHOULD be selected from ValueSet Complications (1.3.6.1.4.1.19376.1.4.1.5.46) STATIC.

2815   **6.3.4.18 Postprocedure Diagnosis Section 59769-0**

         [`section: templateId 2.16.840.1.113883.10.20.22.2.36(open)`]

The Postprocedure Diagnosis section content module records the diagnosis or diagnoses discovered or confirmed during the procedure. Often it is the same as the pre-procedure diagnosis or indication.

2820   This Postprocedure Diagnosis section content module is used exactly as specified in C-CDA - section 4.42, except for vocabulary constraints.

There is a CRC specific value set defined for problem observations recorded as part of postprocedure diagnosis which is included in the Problem Observation entry.

```
[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.22 (open)]
```

```
([section: templateId 2.16.840.1.113883.10.20.22.2.10(open)] – parent)
```

This Plan of Care - Cardiac section content module is intended to be used to describe the post-procedure plan.

2890 The Plan of Care - Cardiac section content module contains data that defines pending orders, interventions, encounters, services, and procedures for the patient. It is limited to prospective, unfulfilled, or incomplete orders and requests only, which are indicated by the `@moodCode` of the entries within this section. All active, incomplete, or pending orders, appointments, referrals, procedures, services, or any other pending event of clinical significance to the current care of the
2895 patient should be listed unless constrained due to privacy issues. The plan may also contain information about ongoing care of the patient and information regarding goals and clinical reminders. Clinical reminders are placed here to provide prompts for disease prevention and management, patient safety, and health-care quality improvements, including widely accepted performance measures. The plan may also indicate that patient education was given or will be
2900 provided.

> This Plan of Care – Cardiac section content module is a modification of the C-CDA Plan of Care section (C-CDA 4.39). The modifications are highlighted in yellow below. This Plan of Care – Cardiac section content module is also conformant to the C-CDA Plan of Care section content module.

Figure 6.3.4.19-1: Plan of care section example

6.3.4.19.1 Plan of Care Activity Act - Cardiac

[act: templateId 1.3.6.1.4.1.19376.1.4.1.4.17 (open)]

([act: templateId 2.16.840.1.113883.10.20.22.4.39(open)] – parent)

> This Plan of Care Activity Act – Cardiac entry content module is a modification of the C-CDA Plan of Care Activity Act (C-CDA 5.33). The modifications are highlighted in yellow below. This Plan of Care Activity Act – Cardiac entry content module is also conformant to the C-CDA Plan of Care Activity Act entry content module.

1. **SHALL** contain exactly one [1..1] **@classCode**="ACT" (CodeSystem: HL7ActClass 2.16.840.1.113883.5.6) (CONF:8538).
2. **SHALL** contain exactly one [1..1] **@moodCode**, which **SHALL** be selected from ValueSet Plan of Care moodCode (Act/Encounter/Procedure) 2.16.840.1.113883.11.20.9.23 **STATIC** 2011-09-30 (CONF:8539).
3. **SHALL** contain two or more [2..*] **templateId** (CONF:8544-CRC) such that it
   a. **SHALL** contain exactly one [1..1] **@root**="2.16.840.1.113883.10.20.22.4.39" (CONF:10510).
   b. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.4.17" (CONF:CRC-xxx).
4. **SHALL** contain at least one [1..*] **id** (CONF:8546).
5. **SHALL** contain exactly one [1..1] **code**, where the @code **SHOULD** be selected from ValueSet Rx Recommendation (1.3.6.1.4.1.19376.1.4.1.5.42) **STATIC** (CONF:CRC-XXX).
6. **SHALL** contain exactly one [1..1] **statusCode**="completed" Completed (CodeSystem: ActStatus 2.16.840.1.113883.5.14) (CONF:CRC-xxx).
7. **SHOULD** contain zero or one [0..1] **effectiveTime** (CONF:CRC-xxx).
   a. The onset date **SHALL** be recorded in the low element of the effectiveTime element when known (CONF:CRC-xxx).
   b. The resolution date **SHALL** be recorded in the high element of the effectiveTime element when known (CONF:CRC-xxx).
   c. If the problem is known to be resolved, but the date of resolution is not known, then the high element **SHALL** be present, and the nullFlavor attribute **SHALL** be set to 'UNK'. Therefore, the existence of a high element within a problem does indicate that the problem has been resolved (CONF:CRC-xxx).

6.3.4.20 Key Images – Cardiac Section – DCM 121180

[section: templateId 1.3.6.1.4.1.19376.1.4.1.2.21(open)]

The Key Images section content module contains narrative description of and references to DICOM Image Information Objects that illustrate the findings of the procedure reported.

1. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it
   a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.2.21" (CONF:CRC-xxx).
2. **SHALL** contain exactly one [1..1] **code/@code**="121180" Key Images (CodeSystem: 1.2.840.10008.2.16.4 DCM) (CONF:CRC-xxx).
3. **SHALL** contain exactly one [1..1] **text** (CONF:CRC-xxx).
4. **SHALL** contain at least one [1..*] **entry** (CONF:CRC-xxx)
   a. **SHALL** contain exactly one [1..1] **Sop Instance Observation** (2.16.840.1.113883.10.20.6.2.8) (CONF:CRC-xxx).

6.3.5 Common Entry Content Modules

6.3.5.1 Problem Observation – Cardiac

```
[Observation: templateId 1.3.6.1.4.1.19376.1.4.1.9(open)]

([Observation: templateId 2.16.840.1.113883.10.20.22.4.4(open)] –
parent)
```

A problem is a clinical statement that a clinician has noted. In health care it is a condition that requires monitoring or diagnostic, therapeutic, or educational action. It also refers to any unmet or partially met basic human need. In cardiology, problems include hypertension, diabetes, and dyslipidemia.

This Problem Observation – Cardiac entry content module extends the C-CDA Problem Observation entry definition (C-CDA 5.45) by adding the following constraints:

1. **SHALL** contain exactly one [1..1] **templateId** (CONF:CRC-xxx) such that it
   a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.9" (CONF:CRC-xxx).
2. **MAY** contain zero or one [0..1] **entryRelationship** (CONF:CRC-xxx) such that it
   a. **SHALL** contain exactly one [1..1] **@typeCode**="SUBJ" Has subject (CodeSystem: HL7ActRelationshipType 2.16.840.1.113883.5.1002) (CONF:CRC-xxx).
   b. **SHALL** contain exactly one [1..1] **@inversionInd**="true" TRUE (CONF:CRC-xxx).
   c. **SHALL** contain exactly one [1..1] **Severity Observation** (2.16.840.1.113883.10.20.22.4.8) (CONF:CRC-xxx).

6.3.5.2 Lesion Observation

```
[Observation: templateId 1.3.6.1.4.1.19376.1.4.1.10(open)]
```

This Lesion Observation entry content module identifies a lesion of interest for a PCI procedure. The lesion is identified by a global ID in the **id** element and one or more target sites.

91

3035

1. **SHALL** contain exactly one [1..1] **@classCode**="OBS" Observation (CodeSystem: HL7ActClass 2.16.840.1.113883.5.6) (CONF:CRC-xxx).
2. **SHALL** contain exactly one [1..1] **@moodCode**="EVN" Event (CodeSystem: ActMood 2.16.840.1.113883.5.1001) (CONF:CRC-xxx).
3040
3. **SHALL** contain exactly one [1..1] **templateId** (CONF:7299) such that it
   a. **SHALL** contain exactly one [1..1] **@root**="1.3.6.1.4.1.19376.1.4.1.10" (CONF:CRC-xxx).
4. **SHALL** contain at least one [1..*] **id** where the **@root SHALL** be a globally unique root and the **@ext SHALL** be a text string representing the lesion ID (CONF:CRC-xxx).
3045
5. **SHALL** contain exactly one [1..1] **code**, where the @code **SHOULD** be "404684003" selected from SNOMED CT and has @displayName="Finding" (CONF:CRC-xxx).
6. **SHOULD** contain zero or one [0..1] **text** (CONF:CRC-xxx).
   a. The text, if present, **SHOULD** contain zero or one [0..1] **reference/@value** (CONF:CRC-xxx).
3050
      i. This reference/@value **SHALL** begin with a '#' and **SHALL** point to its corresponding narrative (using the approach defined in CDA Release 2, section 4.3.5.1) (CONF:CRC-xxx).
7. **MAY** contain zero or more [0..*] **targetSiteCode**, where the @code **SHOULD** be selected from ValueSet Body Site 1.3.6.1.4.1.19376.1.4.1.5.32 **STATIC**
3055 (CONF:CRC-xxx).
   a. The targetSiteCode, if present **MAY** contain zero or more [0..*] **qualifier** to further identify the exact location of the lesion (CONF:CRC-xxx).

6.3.6 Cath Report Content Vocabulary Constraints

6.3.6.1 Cardiac problems/concerns - Vocabulary Constraints

3060 The content creator shall be capable of creating a problem/concern selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.31, listed below.

Table 6.3.6.1-1: Cardiac problems/concerns 1.3.6.1.4.1.19376.1.4.1.5.31 STATIC

6.3.6.8 Result Observations - Vocabulary Constraints

3095 The content creator shall be capable of creating result observations selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.38, listed below. These results will apply to procedure findings for lesions and the coronary anatomy.

The Procedure Results – Cardiac section content module records clinically significant observations confirmed or discovered during the procedure or surgery.

3100 For this CRC profile, the findings should be organized using Procedure Results Organizer – Cardiac entry content modules for specific categories (e.g. right heart cath findings, coronary anatomy findings, left heart cath findings, and PCI findings). There shall be a Procedure Results Organizer-Cardiac entry content module for one or more of these categories of findings. The allowed categories are defined in 1.3.6.1.4.1.19376.1.4.1.5.43 CRC Procedure Findings Types.

3105 Result Observations – Cardiac entry content modules are used to record specific findings (e.g., stenosis, timi flow, lesion characteristics, or wall motion characteristics) in each category. The specific findings should be selected from the result observations Value Set 1.3.6.1.4.1.19376.1.4.1.5.38, Procedure Findings Constraints / Value Set. Note that these findings may apply to lesions and coronary anatomy.

3110

Syncope	271594007
History of Myocardial Infarction	399211009

Concept \ Coding Scheme	SNOMED CT
Left bundle branch block	63467002
Valvular heart disease	368009
Occupational requirement	429060002
cardiogenic shock	89138009
ischemic heart disease	414545008
cardiac function test abnormal	165076002
heart transplant	32413006
heart disease - congenital	13213009
Cardiomyopathy	85898001
heart disease	56265001
Perioperative Evaluation	430091005
structural disorder of heart	128599005
Pericardial disease	55855009

6.3.6.15 Supported File Formats - Vocabulary Constraints

The content creator shall be capable of creating Supported File Formats selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.45, listed below.

Table 6.3.6.15-1: Supported File Formats 1.3.6.1.4.1.19376.1.4.1.5.45 STATIC

Value Set: SupportedFileFormats 1.3.6.1.4.1.19376.1.4.1.5.45 STATIC	
Graphic Formats	Code
GIF Image	image/gif
TIF Image	image/tiff
JPEG Image	image/jpeg
PNG Image	image/png

3150 ### 6.3.6.16 Complications - Vocabulary Constraints

The content creator shall be capable of creating a complication selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.46, listed below.

Table 6.3.6.16-1: Complications 1.3.6.1.4.1.19376.1.4.1.5.46 STATIC

Concept \ Coding Scheme	NCDR CathPCI Seq #	SNOMED CT
Myocardial Infarction (Biomarker Positive)	8000	22298006

111

Coding Scheme / Concept	NCDR CathPCI Seq #	SNOMED CT
Cardiogenic Shock	8005	89138009
Heart Failure	8101	84114007
CVA/Stroke	8015	230690007
Hemorrhagic Stroke	8021	230706003
Cardiac Tamponade	8025	35304003
Renal Failure	8030	42399005
Other vascular complications requiring treatment	8035	213217008
Anemia due to blood loss	8040	413532003
Bleeding event	8050	131148009
Bleeding at access site	8055	110265006
Hematoma at access site	8060	213262007
Retroperitoneal bleeding	8070	308898001
Gastrointestinal bleeding	8080	74474003
Genital-urinary bleeding	8090	417941003
Other bleeding	8100	131148009
Death in lab	9055	419099009

3155 **6.3.6.17 Anginal Class - Vocabulary Constraints**

The content creator shall be capable of picking one angina class selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.47, listed below.

Table 6.3.6.17-1: Anginal Class 1.3.6.1.4.1.19376.1.4.1.5.47 STATIC

Coding Scheme / Concept	SNOMED CT
Anginal Class: 1	61490001
Anginal Class: 2	41334000
Anginal Class: 3	85284003
Anginal Class: 4	89323001

6.3.6.18 New York Heart Class - Vocabulary Constraints

3160 The content creator shall be capable of picking one New York Heart class selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.48, listed below.

Table 6.3.6.18-1: New York Heart Class 1.3.6.1.4.1.19376.1.4.1.5.48 STATIC

Coding Scheme / Concept	SNOMED CT

Concept / Coding Scheme	SNOMED CT
NYHA Class 1	420300004
NYHA Class 2	421704003
NYHA Class 3	420913000
NYHA Class 4	422293003

6.3.6.19 DICOM CID 3718 - Myocardial Wall Segments in Projection - Vocabulary Constraints

3165 The content creator shall be capable of picking Myocardial Wall Segments in Projection selected from Value Set 1.2.840.10008.6.1.219, listed below.

Table 6.3.6.19-1: Myocardial Wall Segments in Projection 1.2.840.10008.6.1.219 STATIC

Concept / Coding Scheme	SNOMED CT
left ventricle basal anterior segment	264850008
myocardium of anterolateral region	73050001
myocardium of apex of heart	47962008
myocardium of diaphragmatic region	72542009
left ventricle basal inferior segment	264846001
left ventricle basal lateral segment	277631004
myocardium of posterolateral region	33272004
myocardium of inferolateral region	16239001
left ventricle apical septal segment	264845002
left ventricular basal septal segment	277630003
left ventricular posterobasal segment	408720008

Copied from DICOM PS3.16

6.3.6.20 Cardiac Chamber Size Assessments -1.3.6.1.4.1.19376.1.4.1.5.22 DICOM - Vocabulary Constraints

3170 The content creator shall be capable of picking Cardiac Chamber Size Assessments in Projection selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.22, listed below.

Table 6.3.6.20-1: Cardiac Chamber Size Assessments 1.3.6.1.4.1.19376.1.4.1.5.22 STATIC

Concept / Coding Scheme	SNOMED CT
normal size cardiac chamber	373124004
abnormally small cardiac chamber	373125003
mildly enlarged cardiac chamber	373126002
moderately enlarged cardiac chamber	373127006
markedly enlarged cardiac chamber	373128001

113

Copied from IHE Card – CIRC profile supplement (Section 6.3)

3175 ### 6.3.6.21 Pulmonary Veins Assessments -1.3.6.1.4.1.19376.1.4.1.5.23 DICOM - Vocabulary Constraints

The content creator shall be capable of picking Pulmonary Veins Assessments selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.23, listed below.

Table 6.3.6.21-1: Pulmonary Veins Assessments 1.3.6.1.4.1.19376.1.4.1.5.23 STATIC

Concept \ Coding Scheme	SNOMED CT
pulmonary venous connections normal	446158009
variant number of pulmonary veins (usually 3 or 5), but with normal pulmonary venous drainage into left atrium	
anomalous pulmonary venous drainage	59631007

3180 *Copied from IHE Card – CIRC profile supplement (Section 6.3)*

6.3.6.22 Cardiac Shunt Types -1.3.6.1.4.1.19376.1.4.1.5.29 DICOM - Vocabulary Constraints

The content creator shall be capable of picking Cardiac Shunt Types selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.29, listed below.

3185 **Table 6.3.6.22-1: Cardiac Shunt Types 1.3.6.1.4.1.19376.1.4.1.5.29 STATIC**

Concept \ Coding Scheme	SNOMED CT
patent foramen ovale	204317008
atrial septal defect	70142008
ventricular septal defect	30288003
patent ductus arteriosus	83330001

Copied from IHE Card – CIRC profile supplement (Section 6.3)

6.3.6.23 Smoking History -1.2.840.10008.6.1.225 DICOM - Vocabulary Constraints

The content creator shall be capable of picking Smoking History selected from Value Set 1.2.840.10008.6.1.225, listed below.

3190 **Table 6.3.6.23-1: Smoking History 1.2.840.10008.6.1.225 STATIC**

Concept \ Coding Scheme	SNOMED CT
No History of Smoking	266919005
Current Smoker	77176002
Former Smoker	8517006

Copied from DICOM PS3.16

6.3.6.24 Angina Type -1.3.6.1.4.1.19376.1.4.1.5.7 DICOM - Vocabulary Constraints

The content creator shall be capable of picking AnginaType selected from Value Set 1.3.6.1.4.1.19376.1.4.1.5.7, listed below.

3195

Table 6.3.6.24-1: Angina Type 1.3.6.1.4.1.19376.1.4.1.5.7

Concept / STATICCoding Scheme	SNOMED CT
Stable angina	233819005
Unstable angina	4557003
Atypical chest pain	371807002
Myocardial infarction	22298006

Copied from IHE Card – CIRC profile supplement (Section 6.3)
